Delivery Charges & Information

NEW DELIVERY IS NOW FREE FOR MOST ORDERS - SEE BELOW FOR DETAILS

Delivery is now free for most orders and because we grow the vast majority of plants here at the nursery it is also quick, we can send them out to you within a day or two of ordering (although you can of course choose to delay your delivery for a week or two if you need to prepare the site for planting first). Pre-season orders for seasonal plants such as bare root and root ball hedging are sent out as soon as they are available (Normally October onwards for Rootballs and November onwards for bare root) and we will always willingly try to accommodate delivery on a specific day, this is more certain you can give us a little notice. If you are organising help with planting on a certain day we would strongly recommend talking delivery a day or two before as our carriers can deliver as late as 7pm.

STANDARD PARCEL DELIVERY ITEMS

Delivery is free for all standard parcel delivery items in our catalogue for orders over £50 (excluding VAT), for orders under £50 (excluding VAT) we charge a nominal £9.95 (+ VAT) towards our costs. Our minimum order is £20 (excluding delivery and VAT)

All items in our catalogue are standard delivery unless marked with the pallet icon please see below for these plants.

PALLET DELIVERY ITEMS

Some taller or heavier plants marked are too large to be sent out in parcels and are delivered to you on a pallet. Delivery of these plants is still free to customers but the cost of delivery to us is substantial so we need your order to be a minimum of £200 (excluding VAT) in order to qualify for free delivery. This can be made up from any combination of plants.

Delivery of smaller orders including pallet delivery items under £200 (ex VAT) is no problem but we do ask for a contribution of £49.95 (+VAT) towards packing and delivery costs.

All pallet deliveries are booked in with you with a phone call from our sales office on a mutually convenient day so you know when your plants are coming.

WHOLESALE PACK DEALS

We have literally hundreds of these popular discounted deals on our website in season, perfect if you need a lot of plants and can buy in units of 100 plants. This is a very quick and efficient way for us to work and we are delighted to acknowledge this with generous discounts. Delivery is still free for these packs, but in the spirit of wholesale we have a minimum order threshold of £200 (+VAT) to qualify for free delivery. For smaller orders of wholesale packs, we ask for a very reasonable contribution of £9.95 (+VAT) towards delivery.

PALLET DEALS

Many of our hedging plants are available in generously discounted pallet deals, by maximising the number of plants on a pallet we can minimise the cost of delivery and pass this saving on to you! Delivery is free for all pallet deals together with discounts of up to 20% off our catalogue prices and you can add any combination of other plants to your order and get them delivered free as well!

DELIVERIES TO OUTLYING AREAS, HIGHLANDS AND ISLANDS

Delivery surcharges apply to some Scottish Highland postcodes and all deliveries over water, for a full list, up to date costs and a map please check the delivery page of our website. These delivery surcharges apply to all orders including pallet deals but we will always try to keep these additional costs to a minimum.

COLLECTIONS

As we are a working and growing nursery with frequent tractor and machinery movements we cannot ensure that we provide a safe retail environment. We are therefore regrettably unable to accommodate customers wishing to collect orders.

We do however have a number of very popular open weekends during the quieter summer months where customers can browse a large section of our growing beds. While the range of plants is not intended to mirror our catalogue, we have a great selection of plants at 'off the nursery' cash and carry prices. Full details of dates and opening times may be found at www.open4plants.co.uk

PRICES

All prices and charges are exclusive of VAT at the current rate.

PAYMENT

Our preferred method of payment is by debit/credit card. We will not take payment until we start to prepare your order, usually a few days before delivery. Payment by BACS is welcome for larger orders over £500, please ask for our bank details. Please note that regrettably, we no longer accept cheques.

DAMAGES AND NON DELIVERY

Whilst all due care and attention is taken to ensure your order is delivered on time and in good condition accidents do occasionally happen. We recommend plants are unpacked and checked as soon as reasonably possible after delivery and that we are notified of any damages, shortages or problems within 10 days of delivery after which you are deemed to have accepted the plants and no further claim will be entertained.

ORDER CANCELLATIONS

We realise unforeseen circumstances may sometimes give need for orders to be cancelled, on such occasions we do regrettably have to apply a 10% handling charge to cover our administration costs. There is no charge for orders cancelled within one week of being placed.

PREPARING FOR THE ARRIVAL OF YOUR PLANTS

Our carriers will deliver your plants on a weekday when you may not be able to plant immediately or the ground may be frozen. If you have ordered bare rooted plants prepare a small area of ground in a sheltered spot before they are delivered so that they can be unpacked and heeled in quickly. The roots should be soaked in water for up to one hour if they are dry. Pot grown and Rootballed plants should be unpacked and stood in a sheltered area before planting and water well if they appear dry.

PLANTING AND CULTURAL INSTRUCTIONS

Before your plants arrive we will send straightforward but detailed instructions on planting to give your plants a good start. Should you have any further queries please do not hesitate to phone our office, our staff will be pleased to answer any questions you may have.

TERMS AND CONDITIONS

All orders are subject to our standard terms and conditions which may be viewed on our website.

Terms & Abbreviations Used In The Catalogue

The ultimate height and spread of any given tree or shrub is always dictated by the soil and climatic conditions where it is planted. No-one, however expert can accurately predict the future size of a given plant in a particular situation. For this reason we are no longer including absolute measurements (e.g. 20ft) for ultimate height. We have instead used a widely accepted system below which represents more accurately the range of heights that a plant can be expected to attain in reasonable conditions.

Dwarf Shrub 1-3ft Small Shrub 3-5ft Small Tree up to 30ft Medium Tree 30-50ft
Medium Shrub 6-10ft Large Shrub over 10ft Large Tree over 50ft

= **PALLET DELIVERY** These plants are too large or heavy to send out with our usual parcel carriers and are therefore delivered on pallets. Our usual carriage and packing charge does not apply, see above for further details.

= **COLLECTION OR DIRECT DELIVERY ONLY** See above for further details.

= **ROYAL HORTICULTURAL SOCIETY AWARD OF GARDEN MERIT (RHS.AGM)**
Plants carrying this symbol have been classed as outstanding for garden use after RHS trials.

OUR PRICE GUARANTEE

At Hopes Grove Nurseries we proudly offer the highest quality of plants and service at the best prices available anywhere. As a genuine growing nursery (a rarity these days!) with over 70 acres of trees and no middle man we can offer genuine 'direct from the nursery pricing'. If you can find the same plants at a cheaper price we want to hear about it! Not only will we match any like for like product you see at a cheaper price, we will give you an extra 10% of the difference as a further discount!

Take us up on our offer if you can! Just call us on 01580 765600 or e-mail (sales@hopesgrovenurseries.co.uk) with the name of the plant, the quantity and size you want to order and a link to the page of the

Website where it is cheaper and we will be pleased to honour the above offer subject to the following conditions:

- Excludes auction sites and private sellers.
- Products must be identical including plant age, size and quantity.
- Websites where the discounted price can only be achieved through a discount code are excluded.
- We will match the total price inclusive of any relevant delivery cost that apply.
- The value of the plants you require must be at least £100 at Hopes Grove Nurseries current prices excluding VAT.

Plant Size Guide

At Hopes Grove Nurseries we grow a huge selection of sizes from the smallest 1 year old seedlings through to super-sized bushy rootballed plants for instant effect, not to mention a complete selection of sizes in pots. Our instant hedging products are available in a range of sizes to give immediate landscape impact. The photos below are intended as a guide to the sizes in our catalogue but please do remember that different species will have varying habits of growth, plants of the same species are all individuals and will not be an absolute carbon copy of each other.

BR = bare rooted seedlings or cuttings

The smallest and most economical one year old plants grown from either seeds or cuttings, easy to transport and plant but some patience is required to create a hedge. Suitable for 'slit planting' as the root system is not normally extensive. Best planted at a higher density to allow for a few losses. Available during the bare root season from November until April.

TR = bare rooted transplants

These plants are usually 2 or 3 years old, they have been lifted and re-planted at a wider spacing on the nursery to produce a sturdier plant with a more extensive root system. Great value plants available in a huge variety of species. Available during the bare root season from November until April.

FW = bare rooted feathered whips

A young bare rooted tree that can be 2, 3 or 4 years old with a good degree of 'feathering' (furnished with young side branches). These are high quality bare root plants grown with extra space specifically for hedging purposes to give coverage from low down on the stem. A little more expensive but still great value. Available during the bare root season from November until April.

FT = bare rooted feathered trees

Older and more developed than feathered whips, these trees have had extra space on the nursery to produce a plant with a more extensive branch structure. Normally 4 or 5 years old these are the largest bare root hedging plants we sell. Good for immediate effect when the budget won't quite accommodate rootballed or large potted hedging plants. Available during the bare root season from November until April.

RB = rootballed plants

These are large and sturdy plants for instant impact and coverage that are grown in our fields at a wide spacing for bushiness. They are carefully lifted from the soil by our specialist machine with the immediate soil and root system which is wrapped in hessian to contain the soil during transport. A good alternative to instant hedging. Great value bushy plants that are available from October until May.

MDN = bare rooted maiden tree

A young bare rooted tree that has been grafted onto a rootstock and grown on for one growing season. This is the most cost effective way to buy ornamental trees. Normally supplied at 100-150cm tall depending on the variety, some varieties will naturally produce side branches while others will just be a single stem at this age. Available from November until March.

Pot grown - 9cm pots : P9cm.

These are great little 'starter plants' and will give fantastic results on a restricted budget with just a little care and attention in the early stages after planting. Usually 1 year old, we sell literally tens of thousands of these every year in a wide range of species. Available all year round.

Pot grown - 1 litre pots : P1litre

A larger version of the 9cm pots, these 1 litre pots have at least twice the volume of compost and are either 1 or 2 years old depending on the species. Still easy to plant and handle but just that bit bigger, they represent very good value. Available all year round.

Pot grown - 2 litre pots : P2litre

Usually a 2 year old plant that has been re-potted from a cutting or small pot with more space and compost. While they are small enough to not break the bank, they do have some impact after planting. A popular size that we offer most species in. Available all year round.

Pot grown - 3 litre pots : P3litre

Larger and more developed 2 or 3 year old hedging plants that have usually been trimmed during their time on the nursery and have had more space. These plants are similar in size to the majority of shrubs you would see in a typical garden centre. Large enough to make some impact on planting. Available all year round.

Pot grown - 4 & 5 litre pots : P4litre, P5litre

A larger grade of plant often with a good degree of height without being too expensive, many of our customers come to the conclusion that this is the 'sweet spot' between the smaller specimens and the larger and more expensive plants that their budget won't quite push to. Available all year round.

Pot grown - 7.5 litre pots : P7.5litre

We use this pot size for the 'shrubbier' species that we grow on from 2 or 3 litre pots with lots of space and attention to pinching and trimming to make them into bushy specimens. They will usually give good coverage if planted at 2-3 plants per metre. Available all year round.

Pot grown - 10 litre pots : P10 litre

These larger specimens have usually been re-potted from 3 litre pots and grown on with lots of space and a tailored diet of water and fertiliser dispensed through our drip irrigation system. Most species will have a bamboo cane to keep them nice and straight. Available all year round.

Pot grown - 15 litre pots : P15litre

These more mature plants are great for instant effect, they have been re-potted from either 5 litre pots or young rootballed plants and then grown on with extra space in our tree lines. They give great coverage when used at 2 or 3 plants per metre to establish an (almost) instant hedge. Available all year round.

Pot grown - 25 litre pots : P25litre

These are the largest pot grown hedging plants to give immediate impact on planting and coverage, similar in stature and bushiness to large rootballed plants. As there is no root disturbance, these plants often go ahead a little more quickly than a rootballed plant making them popular with customers seeking a fast covering hedge. Available all year round.

Instant hedging

Purpose grown units of hedging usually grown in 1 metre sections. These can be supplied as young troughs with heights up to 1 metre or so that have been trimmed at the sides a number of times or larger and more mature trough hedges with heights between 1 and 2 metres depending on the species. We also supply 'show garden' quality hedge elements for truly instant privacy. Available all year round.

Accessories

ROOTGROW MYCORRHIZAL FUNGI (FRIENDLY FUNGI)

Key Benefits of Planting with RootGrow

RootGrow enhances a plant root system so a newly planted plant:

- Finds more food, finds more water.
- Needs less fertiliser.
- Establishes quicker and reduces failure rates.
- Has increased tolerance to drought and adverse soil conditions.
- These fungi are completely natural and organic and native to UK soils and this is the first such product to be recommended by the RHS.

How Do They Work?

Mycorrhizal fungi are widespread throughout nature and are fundamental to plant growth and development. Over 90% of plants associate with these natural organisms as a mechanism for sustained water and nutrient supply.

These fungi colonise the plant roots, extending the root system into the surrounding soil through an extensive network of threadlike fungal filaments (up to a kilometre in 1kg of soil). This network acts as a secondary root system extracting water and nutrients from a far greater volume of soil than would be possible by the plants own root system alone. This is shown by the Larch seedlings in the picture, the volume of soil filled by larger red/brown Larch roots is greatly increased by the secondary white network of the fungi. This established secondary root network allows links between all of the plants which can then share the increased supply of water and nutrients throughout the plant community.

It is now recognised that the lack of the Mycorrhizal relationship is a major cause of poor plant and tree establishment. While a plant will gradually develop its own Mycorrhizal root system, planting them with RootGrow will speed this process up. It can take 3 years for it to develop naturally, while using RootGrow can get the Mycorrhizal root system established in one month.

Application

Sprinkle RootGrow evenly into the base of the planting hole, the granules must touch the plant roots. Also available in a gel mix pack which is combined with water so plants roots may be dipped before planting. (Gel packs can still be used dry if preferred). The number of plants treated from a pack of RootGrow is outlined below.

PACK SIZE	150g	360g	1KG	2.5KG	5KG
GEL PACK	NO	YES	YES	YES	YES
Bare root plants up to 40/60cm, 9cm pots	40	100	300	750	1500
Bare root plants 60cm - 100cm, 11cm pots	30	75	200	500	1000
Bare rooted plants from 100 up to 150cm, 1 litre and 1.6 litre pots	20	50	120	300	600
Bare rooted plants 150cm+, Maiden trees, 2 and 3 litre pots	10	25	60	150	300
4, 5 and 6 litre pots, Rootball plants up to 60cm	5	12	30	75	150
7.5 litre pots, Rootball plants 60-100cm	4	10	25	60	120
10 and 15 litre pots, Rootball plants 100-150cm	3	7	20	50	100
25 litre pots, Rootball plants 150-200cm	2	4	10	25	50
Rootball plants over 200cm	1	3	8	20	40
PRICE PER PACK	£4.99	£10.99	£24.99	£46.99	£85.99

RootGrow will benefit all plants except Azaleas, Rhododendrons, Heathers, Brassicas, Cranberries and Blueberries.

Bone Meal

The only fertiliser we recommend for planting new trees, shrubs and hedges. A natural organic slow release feed promoting strong healthy root growth. A small sparing handful should be well mixed with the soil for each plant, less for small closely spaced plants such as Box and Lavender. As a rough guide 1 kilo is sufficient for 15 metres of general hedge planting.

1kg pack £2.99

5kg pack £12.99

25kg pack £35.99

After Plant Evergreen Bio-active Fertiliser

A great fertiliser for both new and established evergreen hedging and other garden plants, After Plant Evergreen is a fertiliser with Rootgrow, nitrogen fixing bacteria and seaweed, it is ideal for complementing Rootgrow used at the time of planting. After plant evergreen will promote healthy root development and keep evergreen foliage looking healthy and fresh throughout the season

Apply to the soil around your plants as a top dressing incorporating it gently into the top few centimetres and then water in well if the weather is dry. Apply at the rate of 25g (roughly a small handful) per metre of hedge or for general garden use, 25g per square metre of bed. After plant is also a great product for freshening up tired evergreens in containers, especially topiary plants using the same rate per square metre of pot surface as a guide, ideally with the addition of some fresh compost and well-watered in.

1kg pack (sufficient for 40 metres of hedge)

£7.99

Empathy all-purpose Seaweed Bio-Stimulant

A useful professional grade seaweed fertiliser with bio stimulants manufactured from sustainably harvested kelp, supplied in a ready to use liquid concentrate for use on all types of plants. The natural hormones in the fertiliser are taken up by plants and will promote stronger growth of roots and shoots while encouraging beneficial bacteria, soil microbes and mycorrhizal fungi on plant roots.

Empathy all-purpose seaweed fertiliser is simply diluted in a large watering can and may then be applied to the soil or directly to the foliage. Empathy seaweed fertiliser will benefit all newly planted hedges, especially Box hedges and topiary as this is an excellent source of Magnesium to promote a rich and healthy deep green colour.

Supplied in a 1 litre pack, sufficient for up to 50 watering cans of diluted feed

£7.49

Planting Sundries

Bamboo Canes

Bamboo Canes

We supply Bamboo canes that have many uses in the garden. They are ideal for supporting young plants where spiral tree guards are used, especially on exposed sites.

Buckle Tree Ties

Very strong, ideal for supporting newly planted trees.

Large - 25mm x 45cm (1" x 18")		
99p each for 1-49	90p each for 50-249	80p each for 250 or more

Heavy Duty Landscape Fabric

Manufactured from UV stabilised black polypropylene which is woven making a very strong opaque material that is permeable to water. Ideal for suppressing weeds around newly planted trees and shrubs, also for covering greenhouse benches and standing out areas for pots. Lasts for years and easily cut with scissors. Now available in two sizes.

1m x 10m (3.25ft x 32.5ft) pack £8.95	1m x 100m (3.25ft x 325ft) roll £65
2m x 10m (6.5ft x 32.5ft) pack £16.95	2m x 100m (6.5ft x 325ft) roll £119

Landscape Fabric Staples

The easy way to secure landscape or fleece. These large metal staples are 4ins x 6ins in size and push in flush to the ground. Simply inset 1 staple every 3ft to the end to prevent any dislodgment by wind. Easily removed and re-used.

29p each for 1-49	26p each for 50-249	24p each for 250+
-------------------	---------------------	-------------------

Soaker Hose - Porous Pipe Watering

Adequate watering during dry weather is essential to the success of newly planted trees and shrubs. Our watering kits are a water efficient, cost effective way to water newly planted hedges, they may also be used for vegetables, fruit, flower borders and greenhouses. Porous pipe is a recycled material made from old car tyres, it provides gentle and precise watering along its entire length. The hose only requires low pressure and may be fed from the mains or from water butts etc. The pipe can be laid on the surface of the soil but is ideally covered with mulching materials to reduce evaporation. One length of hose will easily water a single or double row hedge as the water will spread up to 18ins either side of the hose. For larger areas the hose should be laid at 3ft intervals. A strong heavy duty product that will last for years.

Supplied ready to use, complete with standard hose connector, shut-off tap and 2 each end closures, 'L' connectors, 'T' connectors and straight connectors. Maximum working length at any one time is 50 metres (165ft).

25 metre (82ft) complete	£34.99
50 metre (165ft) complete	£62.99

Tree Stakes

Softwood tree stakes are ideal for young trees when used with buckle ties, or for supporting tree shelters. Available in 2 sizes, 90cm x 25mm x 25mm (3ft x 1" x 1") or 1.5 metres x 32mm x 32mm (5ft x 1.25" x 1.25")

Bare Root Hedging TREES, SHRUBS AND CONIFERS Alder Common - Buckthorn Alder

This is the traditional and economical way to purchase hedging and young trees. These plants are grown in the soil in our fields and can only be sold when dormant, usually from November until early April. Bare rooted trees are a low cost, low input crop (we don't need pots, compost etc) and so represent great value for money.

Planting density is very much a matter of choice and budget but we recommend taking full advantage of these low cost plants and planting a staggered double row (Page 29) to give a dense bushy hedge.

A single row will give coverage if you are patient. Some customers choose to order a few spares and pop them in the veg patch/flower border to replace the occasional failed plant which should be expected. (Bare rooted plants should achieve a 'take' of 95% or more so it is worth adding a few extras into your calculations when ordering to infill the occasional gap later).

Occasionally a higher rate of plants may fail to grow in which case we would normally offer to replace these at half price plus our usual delivery charge as a gesture of goodwill.

During the summer months we build up several thousand pre-season orders for bare-roots. These orders take priority at the beginning of the busy November lifting season (which is the best time to plant).

If you would like a November delivery please order early. All customers ordering bare roots by August 31st will receive generous discounts and will be assured of a November delivery slot. Our minimum order for bare root hedging is 3 plants per size/variety.

	Size(s) Available	Age	Price/plant for qty shown (All prices exclude VAT)			
			3-9	10-49	50-249	250+
Alder Common Alnus Glutinosa A large fast growing deciduous native tree with shiny green leaves and catkins that appear in late winter. The seeds are enclosed in false cones and provide valuable food for small birds. Thrives in wet, boggy situations. Widely used for coppicing and as windbreaks as this tree does not generally harbour pests and diseases. Suitable for hedges and screens 2 metres and upwards. Hedge planting density: 3-5 plants per metre for a hedge, 1-2 plants per metre as a taller windbreak. Grows 50cm per year. Trim in summer. Taller pot grown trees: 175/200cm P7litre £15.95 each. £13.95 for 5 or more.	40/60cm BR 60/100cm TR 100/125cm TR 125/150cm TR 150/175cm TR	1 2 2 2 2	1.69 1.99 2.49 3.29 5.29	0.65 0.91 1.44 1.97 3.92	0.56 0.79 1.25 1.71 3.44	0.49 0.69 1.09 1.49 2.99
Alder Grey Alnus Incana A large fast growing native tree with ovate leaves which are grey underneath, catkins up to 10cm long in spring and false cones in autumn. More attractive and tolerant of harsh conditions than Common Alder. As with all Alders prevents soil erosion. Suitable for hedges and screens 2 metres and upwards. Grows 60cm per year. Trim in summer.	100/125cm TR	2	2.59	1.71	1.49	1.29
Alder Italian Alnus Cordata A large fast growing deciduous conical tree with glossy deep green heart shaped leaves, yellow brown catkins appear before the leaves in late winter. An excellent tree for wet sites and poor soil including chalk. Suitable for hedges and screens 2 metres and upwards. Hedge planting density: 3-5 plants per metre for a hedge, 1-2 plants per metre as a taller windbreak. Grows 60cm per year. Trim in summer. Taller pot grown trees: 175/200cm P7litre £15.95 each. £13.95 for 5 or more.	100/125cm TR	2	2.59	1.71	1.49	1.29
Aspen Populus Tremula Medium sized, fast growing native tree with conspicuously toothed greyish green leaves that, like most poplars, quiver in the slightest breeze. Long grey catkins in late winter, butter yellow autumn leaf colour. Most matches are made from the timber of this tree. Any reasonable soil, but will thrive in moist conditions. Taller pot grown trees: 175/200cm P7litre £15.95 each. £13.95 for 5 or more.	120/150cm TR	2	6.99	5.28	4.59	3.99
Amelanchier Lamarckii Snowy Mespilus Large shrub with bronze leaves turning to green and small white flowers in spring. Excellent red/orange autumn colour and edible black berries. Tolerant of most soils it is suitable for hedges 1.2-2.5 metres or as a showy compact tree for smaller gardens. Hedge planting density: 3-5 plants per metre. Grows 30-50cm per year. Trim after flowering. Taller pot grown trees: 175/200cm P7litre £15.95 each. £13.95 for 5 or more.	60/100cm TR 100/125cm TR 125/150cm TR	2 2 3	2.79 3.49 5.29	1.58 2.23 3.92	1.37 1.94 3.44	1.19 1.69 2.99
Beech Green Fagus Sylvatica Large native tree widely used for hedging. The mid green leaves turn a russet brown in late autumn and are retained in winter giving the privacy of an evergreen hedge. Tolerant of all but very wet soils (where hornbeam is more suited). Useful for roadside hedge planting as the brown winter foliage is unharmed by salt spray and pollution. Suitable for hedges 90cm and upwards. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre, smaller plants may be planted at 7 per metre (see Page 29 for details). Grows 30-60cm per year. Best trimmed in late summer as this ensures better winter leaf retention. Berberis Green Berberis Thunbergii This medium sized deciduous shrub makes an excellent prickly hedge. Yellow flowers in spring, glossy red barberries in autumn, compliment the brilliant orange and red leaf colour. One of the best hedges for security purposes. Shade tolerant. Suitable for hedges 90-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim after flowering.	30/40cm TR 40/60cm TR 60/90cm TR	2 2 3	2.19 2.49 3.59	1.18 1.44 1.98	1.02 1.25 1.82	0.89 1.09 1.59
Berberis Purple Berberis Thunbergii Atropurpurea A medium sized deciduous shrub makes an excellent prickly hedge. Yellow flowers in spring, glossy red fruits in autumn compliment the brilliant red leaf colour. Dark red/purple foliage in summer. Excellent for security purposes. Shade tolerant. Suitable for hedges 90-200cm. Hedge planting density: as green Berberis. Grows 30cm per year. Trim after flowering.	30/40cm TR 40/60cm TR 60/90cm TR	2 2 3	2.19 2.49 3.59	1.18 1.44 1.98	1.02 1.25 1.82	0.89 1.09 1.59
Birch Downy Betula Pubescens (Common White Birch) Easily grown tough native species of Birch that will thrive on a wide variety of soil types but particularly in damp situations. Similar to Silver Birch except for the downy covering on the shoots and a rather less weeping habit.	120/150cm TR	2	3.29	1.97	1.71	1.49
Birch Silver Betula Pendula Large narrowly conical native deciduous tree with peeling white bark. The diamond shaped mid green leaves turn yellow in autumn. Produces yellow/brown catkins in early spring. Graceful arching branches also make this an attractive specimen tree. A versatile plant suitable for almost any situation. Grows 30-50cm per year. Taller pot grown trees: 175/200cm P7litre £15.95 each. £13.95 for 5 or more.	60/100cm TR 120/150cm TR	2 2	1.99 2.59	0.91 1.71	0.79 1.49	0.69 1.29
Blackthorn Prunus Spinosa (Sloe) Large deciduous native shrub, dense bushy growth. White flowers in spring are followed by damson like sloes that are perfect for flavouring Gin! Deep green foliage, very prickly and tolerant of any soil. Suitable for hedges 90-300cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre smaller plants may be planted at 7 plants per metre. (See Page 29 for details). Grows 30cm per year. Trim as required. Box Common Buxus Sempervirens Slow growing native evergreen shrub which can attain 5 metres or more if untrimmed. Dense growth and small leaves make this plant ideal for small formal hedges and topiary. Shade tolerant. Suitable for hedges 30cm and upwards. Hedge planting density: for a single row use 4-5 plants per metre. Grows 10-15cm per year. Trim in summer traditionally on Derby Day. (Pot grown, Rootballed and Topiary Box plants are on Page 15. See also Sweet Box on Page 27).	15/20cm TR 20/25cm TR 25/30cm TR 30/40cm TR 40/50cm TR	2 2 3 3 4	2.49 2.79 3.29 3.79 4.99	1.46 1.65 1.98 2.65 3.29	1.38 1.56 1.90 2.56 3.12	1.29 1.49 1.86 2.49 2.89
Box Dwarf Buxus Sempervirens Suffruticosa Please see page 15 for our full range of potted Dwarf Box Hedging.						
Box Faulkner Buxus Microphylla Faulkner Small evergreen shrub. A superb recently introduced variety, rounded emerald green foliage and mound forming habit make it suitable for low edgings and hedges or even ground cover. Shade tolerant. Suitable for hedges 30-90cm. Hedge planting density: for a single row use 4-5 plants per metre. Grows 10cm per year. Trim in summer. (Pot grown plants are on Page 15).	30/40cm TR	3	3.79	2.65	2.56	2.49
Buckthorn Alder Rhamnus frangula (Frangula alnus) Large bushy, deciduous native shrub or small tree with glossy oval green leaves that turn yellow in autumn. Produces red fruits which gradually turn black, a very attractive plant when bearing fruits of both colours. A good plant for attracting wildlife, will grow in any reasonable soil but will thrive on wet sites. Suitable for hedges 120-300cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim as necessary.	60/100cm TR	2	1.99	1.31	1.14	0.99

			3-9	10-49	50-249	250+
Buckthorn Common Rhamnus Cathartica Large deciduous native shrub. Dense thicket forming habit with green flowers in spring and large quantities of spherical red fruits that mature to shiny black in autumn, the dark green foliage then turns yellow. Suitable for hedges 120-300cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim as necessary.	60/100cm TR	2	1.99	1.31	1.14	0.99
Buckthorn Sea Hippophae Rhamnoides Large deciduous native shrub. This prickly shrub has silvery green foliage bearing tiny yellow flowers in spring on female plants which are followed by bright orange berries in autumn which frequently stay until winter. Thrives in coastal conditions. Requires well drained soil. Suitable for hedges 120-200cm. Suitable for hedges 120-300cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim as necessary.	60/100cm TR	2	3.29	1.71	1.48	1.29
Cherry Bird Prunus Padus Small to medium native deciduous tree. Long slender racemes of white almond scented flowers in late spring followed by black fruits favoured by birds. Dark green leaves turn yellow red in autumn. Tolerant of all but very wet soils. Grows 30cm per year. (Taller pot grown trees - Page 37)	60/100cm TR 100/125cm TR	2 2	2.29 3.49	1.31 1.98	1.14 1.72	0.99 1.49
Cherry Cornelian Cornus Mas Small deciduous tree or large shrub. Dark green oval leaves which turn reddish purple in autumn. Masses of small yellow flowers are produced in late winter before the leaves and are followed by fleshy bright red fruits in late summer. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim as required.	60/100cm TR	2	3.29	1.84	1.62	1.39
Cherry Wild Prunus Avium (Gean) Large deciduous native tree. A very attractive woodland tree with dark green leaves, bronze when young turning red and yellow in autumn. White flowers in spring are followed by edible red fruits in summer. Suitable for all but very wet soils. Grows 30-60cm per year. Taller pot grown trees 150/200cm P7 litre £15.95 each or £13.95 for 5 or more.	120/150cm TR	2	3.49	1.98	1.72	1.49
Christmas Trees Nordmann Fir Abies nordmanniana This is the popular premium 'non drop' Christmas tree. Slow but easily grown with shiny green foliage with a white underside developing into neat tiers of horizontal branches. Norway Spruce Picea abies The traditional Christmas tree, a faster growing conifer with deep green foliage forming a taller columnar tree when fully developed.	15/25cm TR 25/40cm TR	3 3	2.49 2.29	1.58 1.04	1.38 0.91	1.19 0.79
Cotoneaster Franchetii An adaptable and easy to grow semi-evergreen Cotoneaster with ovate grey-green foliage. The white flowers are suffused red and appear during summer followed by bright orange-red fruits during autumn and winter. Cotoneaster franchetii can be grown as a specimen shrub but as it clips beautifully lends itself more as an excellent hedging plant especially near the sea. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. Grows 30-40cm per year. Trim in late winter.	40/60cm TR	2	2.59	1.18	1.02	0.89
Cotoneaster Lacteus May be found Page 17						
Cotoneaster Simonsii An upright semi-evergreen Cotoneaster with glossy dark green foliage which turns to red in autumn. Pink tinged-white flowers appear in summer followed by colourful orange-red fruits that last into winter. A good plant for shade. Suitable for hedges 90-200cm. Hedge planting density: for a single row use 3 plants per metre. Grows 30cm per year. Trim in late winter.	40/60cm TR	2	3.29	1.71	1.48	1.29
Crabapple Wild Malus Sylvestris Small deciduous native tree. The common crabapple makes a small round headed tree with mid green leaves and clusters of white or pink tinged flowers, these are followed by yellowish green crabapples suitable for jelly making. The wild Crabapple makes an excellent, tough hedging plant. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Unsited to wet sites. Grows 30cm per year.	60/90cm TR 890/120cm TR	2 2	1.99 3.49	0.91 1.98	0.79 1.72	0.69 1.49
Deutzia Scabra 'Plena' Deutzia's are easily cultivated and versatile deciduous shrubs. Deutzia scabra 'Plena' is an upright variety well suited as a back of border shrub or even as a colourful summer flowering informal hedge. Honey scented panicles of bell shaped double flowers are silky white inside while the outer petals are beautifully suffused with rosy purple, the flowers are at their best during June and July. The pointed leaves are rich deep green in colour, after they fall in Autumn the flaking light brown bark becomes visible. Suitable for positions of full sun or partial shade. For informal hedges use 2-3 plants per metre in a single row. Suitable for hedges 150-250cm. Grows 30cm per year. Trim after flowering, ideally by removing older branches.	40/60cm TR	2	3.49	1.98	1.72	1.49
Dogwood Black Stemmed Cornus Alba Kesselringii Medium sized deciduous shrub with deep green foliage turning a rich purple colour in autumn. Striking purple black winter stem colour makes this plant perfect for planting in bold informal groups with other dogwoods. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 30cm per year. Like all dogwoods hard pruning in spring every other year ensures the best stem colour in winter.	60/90cm TR	2	3.29	1.71	1.48	1.29
Dogwood Common Cornus Sanguinea Large deciduous native shrub with greenish red stems and excellent red autumn leaf colour. White flowers in spring are followed by spherical black fruits. Suited for all soil conditions especially chalky and wet sites frequently seen in native hedgerows. Suitable for hedges 120-300cm. Hedge planting density: for a single row use 3 plants per metre. Grows 30-50cm per year.	40/60cm BR 60/100cm TR 100/125cm TR	1 2 3	1.69 2.29 2.49	0.65 1.04 1.58	0.56 0.91 1.38	0.49 0.79 1.19
Dogwood Gold Variegated Cornus Alba Spaethii Large deciduous shrub with red stems and bright green leaves that have a bold golden yellow edging. Creamy white flowers are followed by blue tinged white fruits. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 30-50cm per year.	40/60cm TR	2	3.89	2.49	2.18	1.89
Dogwood Midwinter Fire Cornus Sanguinea Midwinter Fire Medium sized deciduous shrub with dense twiggy growth and colourful orange, red and yellow winter stem colour. The green leaves also give excellent orange yellow colour in autumn. A very good plant for an informal hedge of about 120cm or planted in groups with other dogwoods. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 15-25cm per year. (Pot grown plants are available on page 17).	30/40cm TR	2	4.99	3.56	3.09	2.69
Dogwood Red Stemmed Cornus Alba Sibirica Large deciduous shrub with outstanding bright red winter stem colour, the green leaves turn red and orange in autumn. Produces flat heads of white flowers and white fruits in autumn. For best effect plant in bold groups. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 30-50cm per year. Like all dogwoods hard pruning in spring every other year ensures the best stem colour in winter.	60/90cm TR	2	2.59	1.18	1.02	0.89
Dogwood Silver Variegated Cornus Alba Elegatissima Large deciduous shrub with reddish stems and green leaves margined with creamy white. Makes a very attractive informal hedge. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 30-50cm per year.	40/60cm TR	2	3.89	2.49	2.18	1.89
Dogwood Yellow Stemmed Cornus Stolonifera Flaviramea Large deciduous shrub with bright yellow winter stem colour which is very effective when planted in bold groups with red stemmed varieties. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 30-50cm per year.	60/90cm TR	2	2.59	1.18	1.02	0.89
Elder Sambucus nigra Familiar vigorous deciduous native shrub with large flat clusters of white flowers in early summer followed by bunches of small shiny black elderberries. A good plant for attracting wildlife and will grow in most situations, especially very chalky sites and coastal areas. The flowers are used to make Elderflower Cordial and Elderflower Champagne while the berries may be used to make wine or syrup. Suitable for hedges up to 5 metres. Hedge planting density: 2-3 plants per metre. Trim as necessary.	60/100cm BR	1	2.59	1.18	1.02	0.89
Flowering Currant Ribes Sanguineum King Edward VII Medium sized deciduous shrub with pendant flowers of intense crimson followed by black berries in autumn. A very attractive spring interest hedge or can be grown as a shrub. Suitable for hedges 90-150cm. Hedge planting density: for a single row use 2-3 plants per metre. Grows 30cm per year. Trim after flowering and again in early autumn if required.	60/90cm TR	2	3.49	1.98	1.72	1.49
Forsythia Spectabilis Large deciduous shrub which is covered in a mass of bright yellow flowers in spring. Upright growth, excellent for an informal hedge of 120-200cm or grown as back of border shrub. Hedge planting density: for a single row use 2-3 plants per metre. Grows 60cm per year. Trim after flowering.	60/90cm TR	2	2.49	1.58	1.38	1.19

Guelder Rose Viburnum Opulus	Large deciduous native shrub or small tree with maple like leaves. The flat lacecap type white flowers are followed by translucent red berries in autumn. Beautiful red autumn colour thrives in wet soil, and is frequently seen in native hedgerows. Suitable for hedges 150-250cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim in winter. (Pot grown plants are on Page 19)	60/100cm TR 100/120cm TR 120/150cm TR	2 3 3	2.29 3.49 3.99	1.31 1.84 2.64	1.14 1.59 2.29	0.99 1.39 1.99
Hawthorn	See Quickthorn Page 13, Ornamental varieties Page 39.						
Hazel Corylus Avellana	Large deciduous native shrub or small tree with yellow catkins in late winter and edible nuts in autumn. Suitable for hedges 150cm upwards. Hedge planting density: for a single row use 3 plants per metre. A staggered double will require 5 plants per metre. Grows 30-60cm per year. Trim in late winter. (Pot grown plants are on Page 19)	40/60cm BR 60/80cm BR 60/100cm TR 100/125cm TR 125/150cm TR 150/175cm TR	1 1 2 3 3 3	1.69 1.99 2.29 3.29 3.99 5.29	0.65 0.91 1.31 1.71 2.49 3.68	0.56 0.79 1.14 1.48 1.89 3.21	0.49 0.69 0.99 1.29 1.89 2.79
Hornbeam Carpinus Betulus	This large native tree is very similar to green beech but may be distinguished by its deeper veining and serrated edge on its mid green leaves. The leaves turn yellow in autumn then a nut brown in winter and are retained when grown as a hedge if trimmed in late summer. Unlike beech will thrive in wet soil and frost pockets. Shade tolerant. Suitable for hedges 90cm upwards. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre, smaller plants may be planted at 7 per metre (see Page 29 for details). Grows 30-60cm per year. Trim in late summer. (Pot grown and Rootballed Hornbeam are on Page 19, Hornbeam Rockhampton Red on page 37)	30/40cm BR 40/60cm BR 60/80cm TR 80/100cm TR 100/125cm TR 125/150cm FW 150/175cm FW 175/200cm FT	1 2 2 2 2 3 3 4	1.49 1.79 2.29 2.79 3.79 4.99 6.99 8.99	0.49 0.65 0.85 1.25 1.12 3.25 5.65 7.48	0.44 0.59 0.79 1.18 1.94 2.98 4.96 6.65	0.39 0.54 0.75 1.09 1.79 2.89 4.39 5.99
Hypericum 'Hidcote'	One of the most popular flowering shrubs with deep green foliage and a dense and bushy habit of growth. Hypericum 'Hidcote' is classed as semi evergreen but will only drop its leaves in the hardest of winters. A relentless succession of large, colourful golden yellow saucer-shaped flowers appear from mid-summer until late autumn on a plant suitable for trimming as a hedge or use as ground cover, especially for more difficult areas like banks and exposed sites. Suitable for full sun or partial shade. For a hedge we recommend 3-5 plants per metre, as ground cover 3-5 plants per square metre for reasonably fast coverage. Grows 30cm per year. Suitable for hedges 80-120cm, trim in winter.	40/60cm TR	2	3.49	1.98	1.72	1.49
Laurel, Caucasic Prunus Laurocerasus 'Caucasica'	A robust, fast growing type of Common Laurel with darker green leaves that are more elongated. 'Caucasica' has an upright habit of growth making it an ideal candidate for hedging and screening purposes. If left untrimmed it will produce fragrant white flowers in spring followed by cherry red fruits that eventually turn black. Plant 3 per metre. Suitable for hedges 120cm upwards, grows 30cm per year. Trim in spring or autumn.	50/70cm TR	2	4.29	2.94	2.72	2.49
Laurel, Common Prunus Laurocerasus Rotundifolia	(Cherry Laurel) Small evergreen tree often grown as a shrub. The large shiny leaves are dark green above, pale green beneath, if left untrimmed it will produce fragrant white flowers followed by conical cherry like red fruits ripening to black. Makes a very broad hedge and is therefore ideal for screening or as a noise barrier. Shade tolerant. Suitable for hedges 120cm and upwards. Hedge planting density: for a single row use 2-3 plants per metre. Grows 30cm per year. Trim in spring or autumn (preferably with secateurs). Bare rooted plants may moult many leaves after planting if not protected with windbreak netting or fleece but will normally re-leaf late in the following spring. This may be avoided by planting rootballed or pot grown plants which suffer far less root disturbance. (Pot grown and Rootballed Laurels are on Page 21)	30/40cm BR 40/60cm TR 50/70cm TR 60/80cm TR 80/100cm TR	1 2 2 2 3	2.59 3.49 3.99 4.49 5.99	1.54 2.18 2.65 2.99 4.49	1.46 2.08 2.48 2.88 4.22	1.39 1.99 2.39 2.79 3.99
Laurel, Compact Prunus Laurocerasus 'Otto Luyken'	A much smaller variety of Common Laurel with narrower, pointed deep green leaves, white flowers in spring and often again in autumn. A shade tolerant and easily maintained evergreen that makes an excellent smaller Laurel hedge up to 90cm and will also make admirable evergreen ground cover in sun or shade. For hedging we recommend 4 plants per metre, as ground cover 4-6 plants per square metre. Grows 15cm per year, trim in autumn or spring.	25/40cm TR	2	4.29	2.94	2.72	2.49
Lonicera 'Elegant' Lonicera Nitida 'Elegant'	(Hedging Honeysuckle) A more compact variety of Lonicera nitida (page 23) that makes an excellent smaller hedge. The tiny deepest green evergreen leaves are tightly packed along arching stems. Although a member of the Honeysuckle family it bears no resemblance to the climbing varieties, this is a dense bushy evergreen that trims perfectly to give a very neat little hedge or even topiary. Suitable for sun or shade but not very cold or exposed areas. For hedges plant 3-5 plants per metre, as ground cover 4-6 plants per square metre. Grows 20-30cm per year. Suitable for hedges 50-150cm. Trim in spring, summer or autumn.	30/50cm TR	2	3.49	1.84	1.59	1.39
Lonicera 'Mairun' Lonicera Nitida 'Mairun'	(Hedging Honeysuckle) Another smaller growing variety of 'Hedging Honeysuckle', Lonicera 'Mairun' has very small bright green evergreen leaves that always seem to look fresh. If left untrimmed creamy white flowers appear in spring followed by attractive purple berries. A great plant for small hedges and topiary that is also well suited as ground cover in any situation from full sun to shade. For hedges plant 3-5 plants per metre, as ground cover 4-6 plants per square metre. Suitable for hedges 50-100cm. Trim in spring, summer or autumn.	30/40cm TR	2	3.49	1.84	1.59	1.39
Maple Field Acer Campestre	A picturesque medium sized deciduous native tree. The green leaves turn a beautiful clear golden yellow in autumn, tolerant of both chalk and limestone soils. Small greenish yellow flowers in spring are followed by winged seeds. Frequently seen in native hedgerows. Suitable for hedges 120cm and upwards. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-60cm per year. Trim in winter. Taller pot grown trees: 150/200cm P7 litre £15.95 each. £13.95 for 5 or more.	40/60cm BR 60/80cm BR 60/100cm TR 100/120cm TR 120/150cm TR 150/175cm TR	1 1 2 2 3 3	1.49 1.79 2.59 2.89 3.69 4.99	0.49 0.65 1.18 1.58 2.36 3.58	0.44 0.59 1.02 1.38 1.79 3.12	0.39 0.54 0.89 1.19 1.79 2.79
Mock Orange Philadelphus Virginial	Large deciduous shrub producing a mass of wonderfully fragrant double white flowers in June and July. Will tolerate almost any soil in sun or shade, makes a large informal hedge 180-240cm in height or can be grown as an excellent back of border shrub. Hedge planting density: for a single row use 2-3 plants per metre. Grows 30-50cm per year. Trim as required after flowering removing older stems. (Other varieties are on Page 25)	50/80cm TR	2	3.59	2.24	1.94	1.69
Mountain Ash Sorbus Aucuparia	Small to medium sized deciduous native tree, white flowers in June followed by large dense bunches of orange red berries in late summer that are very popular with birds. The winter buds are downy and grey in colour, the pinnate leaves turn a very attractive red or yellow in autumn. Easy to grow in all soils and situations. Grows 30cm per year. (Ornamental varieties are on Page 41). Taller pot grown trees: 175/200cm P7 litre £15.95 each. £13.95 for 5 or more.	120/150cm TR	2	3.49	1.84	1.59	1.39
Oak English Quercus Robur	Large deciduous native tree, the familiar pedunculate oak is a slow growing tree highly valued for timber production. A long lived tree developing a broad head with shallowly lobed leaves and acorns in autumn. An excellent tree for attracting wildlife. Tolerant of all except very wet soils, suitable for exposed and coastal sites. Frequently seen in native hedgerows. Grows 15-30cm per year. Taller pot grown trees: 150/175cm P10 litre £18.95 each. £16.75 each for 5 or more.	60/100cm TR 100/125cm TR 125/150cm TR 150/175cm TR	2 3 3 4	2.89 4.29 5.99 7.99	1.56 2.99 4.35 6.85	1.37 2.82 3.78 5.98	1.19 2.49 3.29 5.29
Oak Red Quercus Robra	A large fast growing and broad headed deciduous tree, the large lobed leaves are matt green and turn an attractive red colour in autumn, sometimes with hues of yellow or rusty brown. Smooth grey-brown bark. Any reasonable soil. Taller pot grown plants 150/175cm P10 litre £18.45 each, £15.60 each for 5 or more.	100/125cm TR	3	5.99	4.35	3.78	3.29
Pear Common Pyrus Communis	This is a medium sized tree with rounded glossy green leaves which can give colourful autumn tints. The branches can be smothered in white blossom in April followed by succulent tasting pears. Although normally seen in mixed hedges, Common Pear can be grown as a single species hedge. Hedge planting density: for a single row use 3 plants per metre. As a mature tree it can reach 15 metres.	60/100cm TR	2	3.29	1.78	1.48	1.29
Plum Myrobalan Prunus Cerasifera	(Cherry Plum) Small deciduous tree or large shrub, the bare branches are smothered in white flowers in early spring followed by edible cherry plums in autumn. Mid green foliage forms a dense thorny hedge. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim after flowering.	60/100cm BR 100/125cm TR	1 2	2.29 3.29	1.04 1.78	0.91 1.48	0.79 1.29
Purple Leaf Plum	May be found on page 25.						
Poplar Lombardy Populus Nigra Italica	Large deciduous tree, fast growing distinctive columnar habit with close erect branches. Useful as a tall screen or windbreak in which case it should be planted 2.5-3 metres apart. Grows 60-90cm per year. Taller pot grown trees: 175/200cm P7 litre £15.95 each. £13.95 for 5 or more. (Poplar Purple Tower may be found on Page 39).	125/150cm BR	1	3.99	2.63	2.28	1.99
Potentilla (Shrubby Varieties) Potentilla Fruticosa	These dense, bushy little deciduous shrubs produce a long succession of their colourful saucer shaped flowers from mid spring right through until late autumn, they make great little informal hedges, ground cover or simply as a long flowering and low maintenance addition to any border. Potentilla grows in any reasonable soil in full sun or partial shade. We recommend 3-5 plants per metre for hedging and 4-6 plants per square metre as ground cover. Suitable for hedges up to 100cm. Trim in autumn although wayward straggly shoots can be cut back at anytime.						
Orange flowers (Potentilla fruticosa 'Sunset')	Beautiful deep orange flowers become paler with age.	30/50cm TR	2	3.29	1.98	1.71	1.49
Pink flowers (Potentilla fruticosa 'Pink Queen')	A long succession of clear pink butterfly shaped flowers.	30/50cm TR	2	3.29	1.98	1.71	1.49
Primrose flowers (Potentilla fruticosa 'Primrose Beauty')	Free flowering variety, arching branches clothed in grey-green foliage and primrose yellow flowers that have darker centres.	30/50cm TR	2	3.29	1.98	1.71	1.49
Red flowers (Potentilla fruticosa 'Red Ace')	A more compact variety, the saucer shaped flowers are bright orange-red above fresh green foliage. Best colour is in part shade.	30/50cm TR	2	3.29	1.98	1.71	1.49
White flowers (Potentilla fruticosa 'Abbotswood')	Pure white flowers produced continuously on a sturdy and compact plant.	30/50cm TR	2	3.29	1.98	1.71	1.49

				3-9	10-49	50-249	250+
Privet Green Ligustrum Ovalifolium	This large semi evergreen shrub makes an excellent dense hedge, tolerant of shade and poor soil. Medium sized dark green leaves and fragrant white flowers in summer. Shade tolerant. Suitable for hedges 90-300cm. Bare rooted plants will often shed their leaves after planting but will re-leaf the following spring. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim at any time. (Pot grown and Rootballed Privet are on Page 25)	30/40cm BR	1	1.89	0.78	0.68	0.59

Privet Golden Ligustrum Ovalifolium Aureum	Large semi evergreen shrub, like green privet but with rich gold markings on the foliage. Shade tolerant. Marginally slower growing than green privet. Suitable for hedges 90-300cm. Bare rooted plants will often shed their leaves after planting but will however re-leaf early the following spring. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre giving a really thick dense hedge. Grows 30cm per year. May be trimmed at any time. (Pot grown plants are on Page 25)	30/40cm BR	1	3.29	1.78	1.48	1.29

Privet Wild Ligustrum Vulgare	Large semi-evergreen shrub, shiny green leaves and white flowers followed by black fruits in autumn. May lose its leaves in harsh winters. Useful in mixed hedges, attracts wildlife. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre giving a really thick dense hedge. Grows 30cm per year. May be trimmed at any time. (Pot grown plants are on Page 25)	60/90cm TR	2	2.29	1.31	1.14	0.99
		90/120cm TR	2	3.29	1.98	1.71	1.49
Quickthorn Crataegus Monogyna	Large deciduous native shrub or small tree, vigorous thorny growth and is tolerant of any soil or situation. A profusion of white flowers in spring is followed by scarlet red berries in autumn that can be used to make jams and syrups. The best species for stock proof hedging. Suitable for hedges 90cm upwards Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre, smaller plants may be planted at 7 per metre (see Page 29). Grows 30-60cm per year. Trim in late summer. (Pot grown plants are on Page 25). (See also Mixed Native Hedging on Page 29). Discounted wholesale packs are available on our website for larger quantities.	30/40cm BR	1	1.29	0.39	0.33	0.29

Rose Dog Rose Rosa Canina	Fast growing prickly native shrub with arching stems which carry pale pink flowers in summer and red hips in autumn that are perfect for making Rose Hip Syrup. Good in mixed native hedges. Popular with birds. Height up to 2.5 metres. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows at 30-60cm per year. Trim in winter.	40/60cm BR	1	1.69	0.65	0.56	0.49
		60/80cm TR	2	1.99	0.91	0.79	0.69
Rosa Rugosa Red Rosa Rugosa Rubra	A tough fast growing plant with many small thorns and fragrant rosy red single flowers over an extended period in summer and autumn. Large red hips favoured by birds. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim in winter.	40/60cm TR	2	1.99	0.79	0.74	0.68
		60/100cm TR	2	2.29	1.08	0.96	0.85
Rosa Rugosa White Rosa Rugosa Alba	A tough fast growing plant with many small thorns and fragrant white flowers in summer and autumn. (A slight percentage of pink may occur as this variety is grown from seed). Large red hips. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim in winter.	40/60cm TR	2	1.99	0.79	0.74	0.68
		60/100cm TR	2	2.29	1.08	0.96	0.85
Rose Scotch Rosa Spinosissima	(Rosa Pimpinellifolia) Highly scented single yellow flowers and dark, almost black hips in autumn. Like all scotch roses this will make an excellent dense thicket, often seen in mixed hedges or as a low hedge on its own. Suitable for hedges up to 120cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year. Trim in winter.	60/100cm TR	2	2.29	1.31	1.14	0.99
Rose Sweet Briar Rosa Rubiginosa	Bright pink flowers in summer followed by deep orange hips, aromatic sweet smelling foliage. Makes a good vigorous hedge and is also seen in mixed country hedgerows. Suitable for hedges 120-200cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30-50cm per year. Trim in winter.	60/100cm TR	2	2.79	1.44	1.24	1.09
Snowberry Symphoricarpos X Doorenbosii	These versatile deciduous shrubs produce insignificant, nectar rich flowers on the arching branches during the summer months and then really come alive with colourful and very persistent berries in autumn and winter that are not taken by birds. Snowberry makes an excellent dense hedge or ground cover and is a good choice for wildlife and game cover. Plant in any situation from full sun to dense shade, even under the canopy of large established trees. They are tolerant of pollution, exposed sites and poor soil. For hedging we recommend 3-4 plants per metre or 3-5 plants per square metre as ground cover. Suitable for hedges 120-150cm. Grows 40-60cm per year. Trim in summer.

		125/150cm TR	3	3.69	2.49	2.16	1.89
Spiraea	These graceful deciduous shrubs are grown for their attractive foliage as much as the flowers finding use in borders, as ground cover or as attractive small flowering hedges. All of the varieties here will grow in full sun or partial shade in any reasonable soil, in chalky soils they will appreciate a generous addition of organic matter together with a mulch. We recommend planting 3-5 plants per metre for hedging or 4-6 plants per square metre as ground cover.

		40/60cm TR	2	3.29	1.98	1.71	1.49
Wayfaring Tree Viburnum Lantana	A large deciduous native shrub and familiar country hedgerow plant, particularly on chalk. Large hairy leaves that often turn a crimson colour in autumn, white flowers in spring are followed by orange-red fruits that mature to black. Suitable for hedges 120-300cm. Hedge planting density: for a single row use 3 plants per metre. A staggered double row will require 5 plants per metre. Grows 30cm per year.	60/90cm TR	2	2.79	1.44	1.24	1.09
		90/120cm TR	2	3.29	1.98	1.71	1.49
Weigela	Weigela are attractive deciduous shrubs grown for their colourful clusters of tubular flowers that appear from May-July (and occasionally repeated later in the season) on bushy and easily grown plants. These are great as back of border shrubs or as an informal flowering hedge and will tolerate most soils and pollution in sun or partial shade. For hedges plant 3-4 plants per metre. Suitable for hedges from 120-200cm. Grows 30-40cm per year. Trim after flowering.	40/60cm TR	2	2.99	1.68	1.48	1.29
		50/80cm TR	2	2.99	1.68	1.48	1.29
Willow Golden Salix Alba Vitellina	Large deciduous tree usually grown as a shrub with beautiful egg yolk yellow new shoots if hard pruned every other spring. Catkins appear with the green leaves in the spring. Grows 30-60cm per year.	90/120cm BR	1	2.89	1.57	1.36	1.19
Willow Golden Weeping Salix x Chrysocoma	Large fast growing deciduous tree often seen at the edge of water. Narrow green leaves and golden yellow winter twigs, strong pendulous growth. Grows 30-50cm per year. Our bare root Weeping Willows are straight stemmed, grown on a cane in the nursery. Taller pot grown trees: 175/200cm P7 litre £15.95 each. £13.95 for 5 or more.	100/125cm BR	1	5.99	4.62	3.98	3.49
Willow Scarlet Salix Alba Chermesina	(S.a.Britzensis) The scarlet willow is a stunning deciduous large shrub with brilliant orange-scarlet stems when pruned every other spring. Can be grown as a large tree if left unpruned. Grows 60cm per year.	90/120cm BR	1	2.89	1.57	1.36	1.19
Yew English Taxus Baccata	Large evergreen native conifer, native stands of this plant occur in chalky areas. Highly suitable for all hedges, screens and topiary. A very dense growing shade tolerant plant with fleshy red fruits. A very hardy plant that will grow in any situation providing the soil is well drained. Slow growing but can be greatly hastened with good soil preparation. Suitable for hedges 30cm and upwards. Hedge planting density: for a single row use 3 plants per metre or 5 plants for a staggered double row. Grows 15-30cm per year. Trim in autumn. (Pot grown and larger Rootballed Yew English are on Page 27).	20/30cm TR	3	3.29	1.85	1.76	1.65

Pot grown plants may be planted all year round as there is no root disturbance, provided they are kept well watered if it is dry. Planting density is very much a matter of choice and budget but generally you will need fewer of the larger plants (see Page 3) to cover a given distance. The 'per metre' column is intended as a rough guide to the number of plants you will require per metre of hedge. This will also depend on whether you are planting a single or a double row (Page 29)

Rootballed plants are generally larger/bushier field grown plants (see Page 3) lifted by our specialist rootballing machine with the soil and immediate root system. The rootball is then wrapped in hessian to contain the soil, (which may be left on at planting time as it is biodegradable) Rootballed plants are great for instant impact and are great value for money. Rootballed plants are available from October to early May.

	Size(s) Available	Per metre	Price/plant for qty shown (All prices exclude VAT)				
			1-4	5-24	25-99	100+	
Bay  Laurus Nobilis (Bay Laurel, Sweet Bay)	Large evergreen shrub with leathery aromatic leaves widely used in cooking. Will trim to produce a good evergreen hedge in mild areas or by the coast. Requires a sheltered sunny spot away from cold winds. Is suitable for hedges 90-300cm. Plant 45-60cm apart. Trim in spring. Grows 15-22cm per year. Beech Green  Fagus Sylvatica	Large native tree widely used for hedging. The mid green leaves turn a russet brown in late autumn and are retained in winter giving the privacy of an evergreen hedge. Tolerant of all but very wet soils (where hornbeam is more suited). Useful for roadside hedge planting as the brown winter foliage is unharmed by salt spray and pollution. Suitable for hedges 90cm and upwards. Grows 30-60cm per year. Best trimmed in late summer as this ensures better winter leaf retention. (Also available as Instant Hedging - Page 31) We also have well feathered rootballed plants which will provide screening very quickly at a density of 2-3 plants per metre.	60/80cm P 1 litre 60/90cm P 2 litre 90/120cm P 2 litre 100/125cm P 4 litre  125/150cm P 4 litre  150/175cm P 4 litre  150/175cm P 10 litre  175/200cm P 10 litre  200cm+ P 10 litre  200/225cm P 15 litre  150/175cm RB  175/200cm RB  200/225cm RB 	4-6 3-5 3-5 3-4 3-4 3-4 2-3 2-3 2-3 2-3 2-3 2-3 2-3 2-3	3.59 4.69 5.79 9.19 11.69 14.99 18.49 21.99 24.99 31.29 18.49 21.99 26.59	3.39 4.39 5.59 8.79 10.99 14.39 17.69 20.79 23.99 29.79 17.69 20.79 25.39	3.19 4.19 5.29 8.29 10.49 13.69 16.79 19.89 22.99 28.39 16.79 19.89 22.99	2.99 3.99 4.99 7.89 9.99 12.99 15.99 18.99 21.99 26.99 15.99 19.99 22.99
Beech Purple Fagus Sylvatica Purpurea	Large native tree widely used for hedging. The foliage opens green/purple turning a deep purple in summer and a rich copper in autumn which are retained through winter. Tolerant of all but very wet soils (where hornbeam is more suited). Useful for roadside hedge planting as the brown winter foliage is unharmed by salt spray and pollution. Suitable for hedges 90cm and upwards. Grows 30-60cm per year. Best trimmed in late summer as this ensures better winter leaf retention. Trim after flowering.	20/30cm P 2 litre 30/40cm P 2 litre 40/60cm P 2 litre 40/60cm P 5 litre 60/80cm P 5 litre	3-4 3 3 2-3 2-3	4.99 5.79 6.99 9.29 11.69	4.79 5.59 6.69 8.89 10.99	4.59 5.29 6.49 8.39 10.49	4.29 4.99 5.99 7.99 9.99
Berberis Stenophylla  Evergreen Barberry	Large evergreen shrub making a fast growing prickly hedge. Masses of rich yellow flowers in late spring are followed by spherical blue fruits. Shade tolerant. Suitable for hedges 150-300cm. Grows 30-50cm per year. Trim after flowering.	30/40cm P 2 litre 40/60cm P 2 litre 60/90cm P 2 litre 60/80cm P 5 litre 80/100cm P 5 litre 	3 3 3 2-3 2-3	4.69 4.99 5.99 9.29 11.69	4.39 4.79 5.79 8.89 10.99	4.19 4.59 5.49 8.39 10.49	3.99 4.29 5.29 7.99 9.99
Berberis (other varieties)	Very attractive low maintenance deciduous shrubs with colourful autumn foliage, all will tolerate partial shade and poor soil.						
Dwarf Purple 	This dwarf form has reddish purple foliage throughout the summer turning a brilliant red in the autumn. Dense bushy growth, makes a very attractive low hedge up to 60cm. Trim after flowering.	8/12cm P 9cm 12/20cm P 1.6 litre	4-6 4-5	2.89 5.79	2.69 5.59	2.49 5.29	2.29 4.99
Ottawensis 'Superba' 	Robust fast growing shrub with rich purple foliage, yellow flowers. Excellent back of border plant and for hedging. Suitable for hedges 120-250cm. Grows up to 60cm per year.	40/60cm P 2 litre 60/80cm P 2 litre 60/90cm P 5 litre 90/120cm P 5 litre 	3 3 2-3 2-3	4.99 5.79 9.29 11.69	4.79 5.59 8.89 10.99	4.59 5.29 8.39 10.49	4.29 4.99 7.99 9.99
Rose Glow 	Purple red foliage splashed with pink and white has yellow flowers in spring and bright red berries in autumn. Suitable for hedges 60-150cm.	30/40cm P 2 litre 40/60cm P 2 litre 40/60cm P 5 litre 60/80cm P 5 litre	3 3 2-3 2-3	4.29 4.99 9.29 11.69	4.19 4.79 8.89 10.99	4.09 4.59 8.39 10.49	3.99 4.29 7.99 9.99
Blackthorn Prunus Spinosa	(Sloe) Large deciduous native shrub, dense bushy growth. White flowers in spring are followed by damson like sloes. Deep green foliage, very prickly and tolerant of any soil. Suitable for hedges 90-300cm. Grows 30cm per year. Trim as required.	60/80cm P 1 litre 60/90cm P 2 litre 90/120cm P 2 litre 100/125cm P 4 litre  125/150cm P 4 litre 	3-5 3-5 3-5 3-4 3-4	3.09 4.69 5.09 8.49 10.79	2.99 4.39 4.89 7.79 9.99	2.89 4.19 4.69 7.39 9.49	2.79 3.99 4.49 6.99 8.99
Box Common  Buxus Sempervirens	Slow growing native evergreen shrub which can attain 5 metres or more if untrimmed. Dense growth and small leaves make this plant ideal for small formal hedges and topiary. Shade tolerant. Suitable for hedges 30cm and upwards. Grows 10-15cm per year. Trim in summer traditionally on Derby Day. See also Sweet Box Page 27. We stock a selection of ready shaped Box Topiary during the season from October-April including Balls, Cones and Spirals. An up-to-date list of sizes and prices is always available on our website.	12/20cm P 9cm 20/25cm P 9cm 25/30cm P 1 litre 30/35cm P 1.6 litre 30/40cm P 2 litre 40/50cm P 2 litre 40/50cm P 4 litre 50/60cm P 5 litre 60/80cm P 5 litre 80/100cm P 5 litre 40/50cm RB  50/60cm RB  60/80cm RB  80/100cm RB  100/120cm RB 	4-6 4-6 4-5 4-5 3-5 3-5 3-4 3 3 3 3 2-3 2 2	1.79 2.09 3.09 3.99 4.59 5.79 7.49 9.29 11.69 13.99 9.19 10.79 13.99 20.99 28.99	1.69 1.99 2.99 3.79 4.39 5.59 7.09 8.89 10.99 12.59 8.79 10.49 13.29 19.89 27.59	1.59 1.89 2.89 3.59 4.19 5.29 6.79 8.39 10.49 12.59 8.29 9.99 12.59 18.89 26.29	1.49 1.79 2.79 3.39 3.99 4.99 6.39 7.99 9.99 11.99 8.99 10.99 17.99 24.99
Box Dwarf Buxus microphylla 'Rococo'	Buxus 'Rococo' is a variety of Japanese box (the same family as 'Faulkner') that has tiny elongated fresh green leaves. Rococo is a compact plant and a promising replacement for the dwarf or edging box Buxus sempervirens 'Suffruticosa' that has been decimated by Cylindrocadium box blight. (Which with regret we no longer stock due to its susceptibility). Buxus 'Rococo' is becoming increasingly acknowledged as having some resistance and is suitable for the smallest hedges from 15cm up to about 60cm, ideally with a rounded top as this little buxus likes to grow into a cloud shape naturally. Grows 5-10cm per year, trim in summer.	8/12cm P 9cm 12/20cm P 11cm	6-8 5-7	2.39 3.09	2.29 2.99	2.19 2.89	2.09 2.79
Box Faulkner Buxus Microphylla Faulkner	Small evergreen shrub. A superb recently introduced variety, rounded emerald green foliage and mound forming habit make it suitable for low edgings and hedges or even ground cover. Shade tolerant. Suitable for hedges 30-90cm. Grows 7-10cm per year. Trim in summer.	8/12cm P 9cm 12/20cm P 1.6 litre 20/30cm P 1.6 litre	4-6 4-6 4-6	2.09 3.99 4.59	1.99 3.79 4.39	1.89 3.59 4.19	1.79 3.39 3.99
Box Golden  Buxus microphylla 'Golden Triumph'	A lovely new hardy variety closely related to Buxus 'Faulkner' Golden Triumph has bright yellow new foliage that matures with a yellow and green two tone effect making a great contrast against traditional green varieties or as a colourful little hedge on its own. Shade tolerant, suitable for hedges 30 - 90cm, grows 7 - 10cm per year. Trim in summer.	20/30cm P 2 litre	4-6	4.59	4.39	4.19	3.99
Box Variegated  Buxus Sempervirens Elegantisima	Small evergreen shrub. A very attractive slow growing box with irregular creamy white margins to the leaves comparable to dwarf box in habit and growth rate. Shade tolerant. Suitable for hedges 30-120cm. Grows 5-10cm per year. Trim in late summer.	20/30cm P 2 litre	4-6	4.59	4.39	4.19	3.99

		Size(s) Available	Per metre	Price/plant for qty shown (All prices exclude VAT)				
				1-4	5-24	25-99	100+	
Choisya Choisya Ternata	Bushy growing evergreen shrubs with aromatic leaves and clusters of fragrant flowers in late spring and early summer. Best grown in full sun. Makes a lovely rounded informal hedge of 120-200cm. Grows 30cm per year. Trim after flowering.							
	C. Aztec Pearl	Elegant shrub with bright green leaves divided into 3 or 5 leaflets. White flowers are pink in bud, some further flower in late summer. Grows 180cm x 180cm if left untrimmed.	20/30cm P 2 litre 30/40cm P 5 litre 40/50cm P 5 litre	2-3 2 2	5.79 10.79 11.69	5.59 9.79 10.99	5.29 9.49 10.49	4.99 8.99 9.99
	C. Ternata	Trifoliolate dark green leaves and fragrant 'orange blossom' flowers in early summer and again in autumn. Rounded growth habit up to 180cm.	20/30cm P 2 litre 30/40cm P 5 litre 40/50cm P 5 litre	2-3 2 2	4.99 9.29 11.69	4.79 8.89 10.99	4.59 8.39 10.49	4.39 7.99 9.99
C. Ternata 'Sundance'	Very colourful form of the above variety with bright golden yellow new foliage. Rounded growth habit up to 180cm.	20/30cm P 2 litre 30/40cm P 5 litre 40/60cm P 5 litre	2-3 2 2	5.79 10.79 11.69	5.59 9.79 10.99	5.29 9.49 10.49	4.99 8.99 9.99	
Cotoneaster Lacteus	Large evergreen shrub. Masses of tiny white flowers are produced on arching branches in early summer. The dark green leaves are white felted underneath. Bright red berries in autumn which often last well into winter. Tolerant of dry and shady conditions. Suitable for hedges 150-300cm. Grows 30cm per year. Trim in late winter. (See page 9 for other varieties).	40/60cm P 1.6 litre 60/80cm P 1.6 litre	3-4 3-4	4.39 4.99	4.19 4.79	3.99 4.59	3.79 4.39	
Cotton Lavender Santolina Chamaecyparissus	Small evergreen shrub suitable for low hedges and edgings with aromatic silver foliage on white branches, bright yellow button shaped flowers in July. Best in full sun and well drained soil. Suitable for hedges up to 60cm. Grows 15cm per year. Trim after flowering.	12/20cm P 2 litre	3-4	4.59	4.39	4.19	3.99	
Daisy Bush (Olearia)	The daisy bushes are tough, easily grown evergreen shrubs. A profusion of creamy white daisy like flowers appear during the summer months. These drought tolerant shrubs are well proven and reliable hedging plants, ideal for well drained site and are particularly suitable for chalky soils. Olearias thrive by the sea and are one of the best hedging shrubs for exposed coastal sites.							
	Olearia Haastii	A great alternative choice for a low hedge, dense bushy growth with glossy oval dark green leaves which have a white, felted underside. Dense heads of yellow centred white flowers appear during summer. Grows 30cm per year. Trim in spring.	20/30cm P 1.6 litre 30/40cm P 1.6 litre 40/60cm P 5 litre 60/80cm P 5 litre	3-4 3-4 2-3 2-3	4.99 5.99 9.29 11.69	4.79 5.79 8.89 10.99	4.59 5.59 8.39 10.49	4.39 5.29 7.99 9.99
	Olearia Macrodonata	A stronger and more vigorous variety, large sage green holly-like leaves which have a silvery white underside. Large fragrant heads of creamy white flowers in summer. One of the best larger hedging plants for coastal gardens. Grows 30-50cm per year. Trim in spring.	20/30cm P 1.6 litre 30/40cm P 1.6 litre 40/60cm P 5 litre 60/80cm P 5 litre	3-4 3-4 2-3 2-3	4.99 5.99 9.29 11.69	4.79 5.79 8.89 10.99	4.59 5.59 8.39 10.49	4.39 5.29 7.99 9.99
Dogwood Cornus Sanguinea								
Anny's Winter Orange Cornus sanguinea 'Anny's Winter Orange'	A beautiful variety of the common dogwood with real year round interest, the leaves are soft green during the summer months and turn to hues of coral, orange and butter yellow in autumn. This is one of the best for stem colour, an eye-catching display of yellow at the base deepening to orange and red nearer the tips. Dogwoods are great in beds and borders and look very effective planted in bold groups with other winter interest shrubs. For hedge use 3-5 plants per metre, makes a lovely informal hedge up to 1.5 metres. A good plant for damp sites.	20/30cm P 9cm	3-5	2.79	2.49	2.39	2.29	
Midwinter fire Cornus sanguinea 'Midwinter Fire'	Medium sized deciduous shrub with dense twiggy growth and colourful orange, red and yellow winter stem colour. The green leaves also give excellent orange yellow colour in autumn. A very good plant for an informal hedge of about 120cm or planted in groups with other dogwoods. Hedge planting density: for a single row use 3 plants per metre. For general group planting in beds and borders allow 3-5 plants per square metre. Grows 15-25cm per year.	20/30cm P 9cm	3-5	2.79	2.49	2.39	2.29	
Elaeagnus	Robust evergreen shrubs that are particularly suited to exposed sites and the salt laden winds in coastal areas. All are perfect as back of border shrubs or for hedging. They all have inconspicuous but pleasantly scented flowers, the winter foliage is popular with flower arrangers. Trim in spring.							
Ebbingei	Large evergreen shrub with grey green leaves that have a scaly silver underside, small scented white flowers in autumn are followed by orange fruits in the spring. Suitable for shady, windy and coastal conditions but not very cold situations. Suitable for hedges 120-250cm. Grows 30-50cm per year.	20/30cm P 2 litre 30/40cm P 2 litre 40/60cm P 2 litre 40/60cm P 3 litre 60/80cm P 3 litre 60/80cm P 5 litre 80/100cm P 5 litre 100/120cm P 5 litre 100/120cm P 10 litre 120/150cm P 10 litre	3-4 3-4 3-4 3 3 2-3 2-3 2-3 2-3 2-3	4.39 4.99 5.79 6.99 7.69 9.29 11.69 13.99 18.59 22.99	4.19 4.79 5.59 6.69 7.19 8.89 10.99 13.29 17.69 21.69	3.99 4.59 5.29 6.49 6.89 8.39 10.49 12.59 16.79 20.89	3.79 4.39 4.99 5.99 6.49 7.99 9.99 11.99 15.99 19.99	
Limelight	Young leaves are green with silvery scales that develop a broad central splash of rich yellow and pale green. Suitable for hedges 120-250cm. Grows 30cm per year.	40/60cm P 3 litre	3	6.99	6.69	6.49	5.99	
Pungens 'maculata'	A very colourful evergreen shrub, young leaves are silver-scaly developing into a lustrous combination of rich yellow and green. Suitable for hedges 120-250cm. Grows 30cm per year.	40/60cm P 3 litre 60/80cm P 7.5 litre	3 2	6.99 13.99	6.69 13.29	6.49 12.59	5.99 11.99	
Escallonia Apple Blossom	Medium to large evergreen shrub with bushy dense growth, the glossy dark green leaves provide the backdrop for a profusion of apple blossom pink flowers over an extended period in summer. An excellent informal hedge. As with all Escallonias this variety is ideal for coastal planting. Suitable for hedges 90-200cm. Grows 30-40cm per year. Trim in autumn.	40/60cm P 1.6 litre 60/80cm P 1.6 litre 80/90cm P 5 litre 90/120cm P 5 litre	3-4 3-4 2-3 2-3	4.99 5.79 9.29 11.69	4.79 5.59 8.89 10.99	4.59 5.29 8.39 10.49	4.39 4.99 7.99 9.99	
Escallonia Red Escallonia Rubra	Large evergreen shrub with glossy deep green leaves and a good show of tubular crimson red flowers over an extended period from June until autumn. Well suited to coastal areas. Suitable for hedges 90-200cm. Grows 30-40cm per year. Trim in autumn.	40/60cm P 1.6 litre 60/80cm P 1.6 litre 80/90cm P 5 litre 90/120cm P 5 litre	3-4 3-4 2-3 2-3	4.99 5.79 9.29 11.69	4.79 5.59 8.89 10.99	4.59 5.29 8.39 10.49	4.39 4.99 7.99 9.99	
Euonymus Golden Euonymus Fortunei Emerald n'Gold	Small evergreen shrub with bushy dense habit, the green leaves have a colourful golden edging with a tinge of red in winter. Tolerant of dense shade, also suitable as ground cover. Suitable for hedges 30-60cm. Grows 10cm per year. Trim in late summer.	12/20cm P 1.6 litre 15/25cm P 2 litre 25/30cm P 5 litre	4-5 4 3	3.79 4.99 9.29	3.59 4.79 8.89	3.39 4.59 8.39	3.19 4.39 7.99	
Euonymus Silver Euonymus Fortunei Emerald Galaxy	Small evergreen shrub with bushy dense habit, the green leaves have a colourful silver edging with a tinge of pink in winter. Tolerant of dense shade, also suitable as ground cover. Suitable for hedges 30-60cm. Grows 10cms per year. Trim in late summer	12/20cm P 1.6 litre 15/25cm P 2 litre 25/30cm P 5 litre	4-5 4 3	3.79 4.99 9.29	3.59 4.79 8.89	3.39 4.59 8.39	3.19 4.39 7.99	
Euonymus Japonicus	A stronger growing species with larger oval, glossy deep evergreen leaves and insignificant flowers that are occasionally followed by pink berries. An excellent coastal hedging plant or inland, particularly in partial shade. Drought tolerant when established. Despite being quite slow growing, Euonymus Japonicus makes an excellent low maintenance evergreen hedge once it has grown to height. Suitable for hedges 60-200cm. Trim in summer.	20/40cm P 1.6 litre 40/60cm P 1.6 litre 40/60cm P 2 litre 60/80cm P 2 litre 60/90cm P 5 litre 90/120cm P 5 litre	3-4 3-4 3 3 2-3 2-3	3.79 4.59 4.99 5.79 9.29 11.69	3.59 4.39 4.79 5.59 8.89 10.99	3.39 4.19 4.49 5.29 8.39 10.49	3.19 3.99 4.29 4.99 7.99 9.99	
Euonymus Bravo Euonymus Japonicus 'Bravo'	A lovely form of Euonymus japonicus with a creamy white margin to the evergreen leaves making a colourful well-mannered hedge from 60 - 200cm in height.	20/40cm P 1.6 litre 40/60cm P 1.6 litre 40/60cm P 2 litre 60/80cm P 5 litre 80/100cm P 5 litre	3-4 3-4 3 2-3 2-3	3.79 4.59 5.79 9.29 11.69	3.59 4.39 5.59 8.89 10.99	3.39 4.19 5.29 8.39 10.49	3.19 3.99 4.99 7.99 9.99	
Euonymus Marieke Euonymus Japonicus 'Marieke' (Euonymus Ovatus Aureus)	A similar variety to 'Bravo' except the leaf margins are golden yellow, a lovely and very colourful evergreen hedge. Suitable for hedges 60 - 200cm.	20/40cm P 1.6 litre 40/60cm P 1.6 litre 40/60cm P 2 litre 60/80cm P 5 litre 80/100cm P 5 litre	3-4 3-4 3 2-3 2-3	3.79 4.59 5.79 9.29 11.69	3.59 4.39 5.59 8.89 10.99	3.39 4.19 5.29 8.39 10.49	3.19 3.99 4.99 7.99 9.99

Holly Golden Variegated Ilex x Altadclerensis 'Golden King'	Large evergreen shrub, the broad leaves of this colourful variety have very few spines, the green centre is surrounded by a bright golden edging a female cultivar despite the name. The white flowers are followed by red berries. Shade tolerant. Suitable for hedges 90cm upwards. Grows 20-30cm per year. Trim in summer.	30/50cm P 2 litre 50/70cm P 2 litre 80/100cm P 7.5 litre 📦 100/120cm P 7.5 litre 📦	3-4 3-4 2-3 2-3	4.99 5.79 14.99 19.79	4.39 5.59 14.39 18.79	4.19 5.29 13.69 17.89	3.99 4.99 12.99 16.99
Holly Green 🌿 Ilex Aquifolium	Small evergreen native tree, tough spiny leaves and tiny white flowers in spring are followed by bright red berries on the female plants. The common holly produces a dense impenetrable hedge. We grow the true native holly from English seed to produce a mixture of male and female plants to ensure berrying. Shade tolerant. Suitable for hedges 90cm upwards. Grows 20-30cm per year. Trim in summer.	30/40cm P 9cm 40/60cm P 9cm 60/80cm P 9cm 60/80cm P 1 litre 60/80cm P 2 litre 80/100cm P 2 litre 80/100cm P 5 litre 📦 100/125cm P 5 litre 📦 125/150cm P 5 litre 📦 150/175cm P 5 litre 📦 175/200cm P 10 litre 📦 150/175cm P 25 litre 📦 175/200cm P 25 litre 📦	3-5 3-5 3-5 3-5 3-4 3-4 3 3 3 3 2-3 2 2	2.99 3.49 4.29 4.99 5.79 7.99 10.49 12.99 14.99 18.49 28.99 34.99 41.99	2.79 3.29 3.99 4.39 5.59 7.69 9.99 12.09 14.39 17.69 27.49 32.99 39.69	2.59 2.99 3.79 4.19 5.29 7.39 9.49 11.59 13.69 16.79 26.29 31.49 37.79	2.29 2.79 3.59 3.99 4.99 6.99 8.99 10.99 15.99 24.99 29.99 35.99
Holly Silver Variegated 🌿 Ilex Argentea Marginata	A broad leaved large shrub or small tree. A female form with bright red berries on green leaves with creamy white margins. Can be planted in coastal sites. Suitable for hedges 90-350cm. Grows 20-30cm per year. Trim in summer.	30/50cm P 2 litre 50/70cm P 2 litre 80/100cm P 7.5 litre 📦 100/120cm P 7.5 litre 📦	3-4 3-4 2-3 2-3	4.99 5.79 14.99 19.79	4.39 5.59 14.39 18.79	4.19 5.29 13.69 17.89	3.99 4.99 12.99 16.99
Holly Japanese Box Leaved Ilex crenata	A much smaller leaved type of Holly, the glossy foliage is free of spines and the plants have a dense bushy habit of growth and shiny black fruits in autumn. Japanese Holly makes an excellent dwarf hedge and is generally pest and disease free. A good alternative if Box Blight is a problem. Suitable for hedges from 40-150cm. Plant 30-50cm apart. Grows 15-20cm per year. Trim in summer.						
Holly Japanese Green Ilex Crenata Green Hedge	Small glossy dark green leaves, an excellent substitute for Common Box.	12/20cm P 9cm 20/30cm P 9cm 25/40cm P 2 litre	4-6 4-6 3-5	2.99 3.49 5.79	2.79 3.29 5.59	2.59 2.99 5.29	2.29 2.79 4.99

Hydrangea	Popular deciduous shrubs with large rounded flower heads best grown in a well drained soil with plenty of organic matter added, especially on chalk. A useful group of plants as the large showy flower heads are produced from July onwards when many other plants are passed their best. Remove old flower heads in spring. Mophead varieties will make a good informal flowering hedge if planted at 2 plants per metre. Trim in late autumn.						
Mophead Blue (Hydrangea Renata Steigner)	Large powder blue flowers with a white centre. Grows to 150cm	20/30cm P 2 litre	2	5.79	5.59	5.29	4.99
Mophead Red 🌿 (Hydrangea Masja)	Bushy growing compact variety with large red flower heads. Deep green foliage. Grows to 90cm	20/30cm P 2 litre	2	5.79	5.59	5.29	4.99
Mophead White 🌿 (Hydrangea Madame Moulliere)	Large white flower heads become pink tinged with age. Grows to 150cm	20/30cm P 2 litre	2	5.79	5.59	5.29	4.99
Arborescens Annabelle 🌿	Other Varieties: All make wonderful long flowering additions to any garden, can be planted as an informal hedge at 2-3 per metre. Superb large bushy shrub, during the summer produces a succession of huge rounded white flower heads up to 30cm across. Grows to 200cm.	20/30cm P 2 litre	2	5.79	5.59	5.29	4.99
Paniculata Grandiflora 🌿	Large white flower heads that become pink tinged with age. Grows to 200cm.	30/50cm P 3 litre	2	6.99	6.59	6.29	5.99
Paniculata Limelight 🌿	Unique variety with large bright lime coloured flowers fading to cream and then pink over a long period. A must for flower arrangers. Grows to 200cm.	30/50cm P 3 litre	2	6.99	6.59	6.29	5.99
Paniculata Vanille Fraise	Eye catching new variety with red stems and deep green foliage. Flowers open white from mid June, maturing to pink and burgundy red by September. Grows to 200cm.	30/50cm P 2 litre	2	6.99	6.59	6.29	5.99

Laurel Caucasica Prunus Laurocerasus 'Caucasica'	A robust, fast growing type of common laurel with darker green and more elongated leaves. 'Caucasica' has an upright habit of growth making it ideal for hedging and screening. If left untrimmed it will produce fragrant white flowers in late spring followed by red fruits that eventually turn black. Suitable for hedges 120cm and upwards. Grows 30cm per year. Trim in spring or autumn.	60/80cm P 3 litre 80/100cm P 5 litre 100/120cm P 5 litre	3-4 2-3 2-3	5.79 9.29 11.69	5.59 8.89 10.99	5.29 8.39 10.49	4.99 7.99 9.99
Laurel Common Prunus Laurocerasus Rotundifolia	(Cherry Laurel) Small evergreen tree often grown as a shrub. The large shiny leaves are dark green above, pale green beneath, if left untrimmed it will produce fragrant white flowers followed by conical cherry like red fruits ripening to black. Makes a very broad hedge and is therefore ideal for screening or as a noise barrier. Shade tolerant. Suitable for hedges 120cm and upwards. Grows 30cm per year. Trim in spring or autumn (preferably with secateurs). Also available as instant hedging on Page 31.	30/40cm P 2 litre 40/60cm P 2 litre 60/80cm P 2 litre 60/80cm P 3 litre 80/100cm P 3 litre 80/100cm P 5 litre 90/120cm P 5 litre 100/120cm P 5 litre 120+ cm P 5 litre 120/150cm P 15 litre 150/175cm P 15 litre 150/175cm P 25 litre 80/100cm RB 100/120cm RB 120/150cm RB 150/175cm RB 175/200cm RB 200/225cm RB	3-5 3-5 3-5 3-4 3-4 2-3 2-3 2-3 2-3 2 2 1-2 2 2 2 1-2 1-2 1-2 1-2	3.79 3.99 5.29 5.99 7.59 9.29 11.69 13.99 16.59 22.99 29.99 34.99 13.29 16.59 24.99 36.49 46.29 63.99	3.69 3.89 4.89 5.69 7.19 8.89 10.99 13.29 15.79 21.69 28.69 32.99 12.59 15.79 23.69 34.69 43.99 59.99	3.59 3.79 4.69 5.49 6.89 8.39 10.49 12.59 14.99 20.89 27.29 31.49 11.99 14.99 22.59 32.99 41.99 57.79	4.99 3.69 4.49 5.29 6.49 7.99 9.99 11.99 14.29 19.99 25.99 29.99 11.49 14.29 21.49 31.49 39.99 54.99
Laurel Portugal Prunus Lusitanica	Small evergreen tree or large shrub, dark evergreen leaves and scented white flowers in June followed by small dark red fruits. Tolerant of both full sun, dense shade and even shallow chalky soil. A useful and versatile plant. Suitable for hedges 90cm and upwards. Grows 15-30cm per year. Trim in spring or autumn. Laurel Compact Prunus Laurocerasus Otto Luyken	Small evergreen shrub with compact growth and narrow pointed dark green leaves. White flowers in spring, this plant often flowers again in autumn. Shade tolerant. Suitable for low hedges up to 90cm or as evergreen ground cover with a planting density of 4-6 plants per square metre. Grows 15cm per year. Trim in spring or autumn.	20/30cm P 2 litre 30/40cm P 2 litre	3 2-3	3.99 5.39	3.89 5.19	3.79 4.99	3.69 4.79
Laurel Spotted Aucuba Japonica Variegata	Large evergreen shrub with dense bushy growth and large ovate glossy leaves that have speckled yellow markings. Tolerant of shade, pollution and a wide range of soils. Extensively planted by the Victorians in difficult areas. Suitable for hedges 90-250cm Grows 15-20cm per year. Trim in autumn.	20/30cm P 2 litre 30/40cm P 3 litre 40/50cm P 3 litre 40/60cm P 5 litre 60/80cm P 5 litre	3-4 3 3 2-3 2-3	4.99 6.99 7.59 9.29 11.69	4.79 6.59 7.19 8.89 10.99	4.59 6.29 6.89 8.39 10.49	4.39 5.99 6.49 7.99 9.99

LAVENDER Lavenders are compact, evergreen and easily maintained producing a mass of flowers during the summer months. The lavender scent is familiar and relaxing and is one of the most widely used in aromatherapy. These deservedly popular plants can enhance any garden large or small. All Lavenders make excellent sources of nectar for Bees and other pollinating insects. Lavenders are found in the wild around the Mediterranean region and so require a sunny well drained site. The addition of sharp sand or grit to heavier soils is recommended to improve drainage before planting. Maintenance is easy, simply trim with shears after flowering to keep plants compact they rarely suffer from pest and diseases. As a general rule, *Angustifolia* Lavender will flower from June onwards while *Intermedia* varieties flower a little later from July onwards, by planting a mixture of *Angustifolia* and *Intermedia* varieties a longer flowering season may be achieved. Lavenders are available in a number of sizes and we offer generous discount for larger discounts on our website. We recommend planting 3 plants per metre for a series of rounded 'humps' or 5 per metre for a solid hedge.

French (Lavandula Stoechas 'Papillon')	This beautiful French Lavender has distinctive rose-purple bracts that sit on top of the the purple flower heads. Earlier flowering from late spring onwards and again later in the season if dead headed. Best in a sheltered sunny site. 60cm.	8/12cm P 1.6 litre	3-5	3.99	3.79	3.59	3.39
Grosso (Lx intermedia Grosso)	Mid blue flowers over grey-green foliage. Later flowering in August extending the season. The most widely used variety for commercial Lavender oil and cut flower production. Grows to 90cm.	5/10cm P 11cm 10/20cm P 2 litre	3-5 3-5	2.99 4.99	2.79 4.69	2.59 4.49	2.29 4.29
Hidcote (L.angustifolia Hidcote)	Small evergreen shrub, very popular bushy variety with dark purple – violet flowers from June onwards. This compact variety makes an excellent low hedge up to 60cm.	5/8cm P 9cm 5/10cm P 11cm 8/12cm P 1.6 litre 10/15cm P 2 litre 12/20cm P 3 litre 20/30cm P 5 litre	3-5 3-5 3-5 3-5 3-4 3	2.49 2.99 3.99 4.99 6.29 9.29	2.29 2.79 3.79 4.69 5.99 8.89	1.99 2.59 3.59 4.49 5.69 8.39	1.79 2.29 3.39 4.29 5.39 7.99
Imperial Gem (L.angustifolia Imperial Gem)	A bushy growing English Lavender with tightly packed rich purple flowers above silvery foliage. An excellent substitute for Hidcote. Grows to 60cm.	5/10cm P 11cm 8/12cm P 1.6 litre	3-5 3-5	2.99 3.99	2.79 3.79	2.59 3.59	2.29 3.39
Munstead (L.angustifolia Munstead)	Small evergreen shrub, tight bushy growth producing masses of showy mid blue flowers from June onwards. Grows to 60cm.	5/10cm P 11cm 8/12cm P 1.6 litre	3-5 3-5	2.99 3.99	2.79 3.79	2.59 3.59	2.29 3.39
Provence Blue (Lx intermedia Provence Blue)	This is the variety planted extensively in the Lavender fields of southern France for oil and flower production. Deep blue flowers above robust grey green foliage. More tolerant of our damp English climate than many. Grows to 70cm.	10/15cm P 2 litre	3-5	4.99	4.69	4.49	4.29
Vera (Lavandula intermedia 'Vera', Lavandula intermedia Dutch Group, True English Lavender)	Ambiguously known as both Dutch Lavender and True English Lavender but don't let that put you off. Vera is a lovely robust, tolerant plant with broader silvery foliage than most varieties, and wonderfully scented dusky mauve-purple flowers that appear later in the season, from July until as late as October. Perfect for slightly larger Lavender hedges of 60cm (90cm in flower).	5/10cm P 11cm 8/12cm P 1.6 litre	3-5 3-5	2.99 3.99	2.79 3.79	2.59 3.59	2.29 3.39
White (Lavandula angustifolia 'Edelweiss')	Strong growing, bushy and compact variety, pale pink in bud. Grey-green foliage growing to 2ft.	5/10cm P 11cm 10/15cm P 2 litre	3-5 3-5	2.99 4.59	2.79 4.39	2.59 4.19	2.29 3.99

Leylandii Golden X Cupressocyparis Leylandii Castlewellan Gold	Large evergreen conical tree of dense columnar habit, this variety has golden yellow young foliage becoming a bronze green with age. Slower growing than green leylandii but still ideal as a fast growing hedge, screen or windbreak. Very good for filtering both noise and pollution. Suitable for hedges 120cm upwards. We recommend a planting density of 2 trees per metre for a smaller trimmed hedge. For taller screens and windbreaks (over 250cm) the planting density should be around a quarter of the proposed height. Grows 60-75cm per year. Trim in autumn.	30/40cm P 11cm 40/60cm P 11cm 60/70cm P 11cm 60/80cm P 1 litre 80/100cm P 1 litre 80/100cm P 2 litre 80/100cm P 2 litre 100/120cm P 2 litre 120/150cm P 10 litre 150/175cm P 10 litre 175/200cm P 10 litre	3-4 3-4 3-4 2-3 2-3 2-3 2-3 2-3 2-3 2-3 2-3	2.29 2.99 3.49 3.99 4.59 5.79 6.99 17.39 22.99 28.99	2.19 2.79 3.29 3.79 4.39 4.69 5.59 16.49 21.99 27.59	2.09 2.59 3.09 3.59 4.19 4.49 5.29 15.79 20.99 26.29	1.99 2.39 2.89 3.39 3.99 4.29 4.99 14.99 19.99 24.99

		Size(s) Available	Per metre	Price/plant for qty shown (All prices exclude VAT)			
				1-4	5-24	25-99	100+
Lonicera Nitida (Hedging Honeysuckle)	Medium sized evergreen shrub with very small dark green leaves, makes an excellent tidy formal hedge. Tolerant of salt winds and shady conditions. Much faster growing than box or yew. Suitable for hedges from 45-200cm. Grows 30cm plus per year. Trim in spring or autumn. Other varieties may be found on page 11.	30/50cm P 2 litre 50/70cm P 2 litre	3 3	4.59 5.79	4.39 5.59	4.19 5.29	3.99 4.99
Lonicera Baggessons Gold (Golden Hedging Honeysuckle) <i>Lonicera Nitida Baggessons Gold</i>	(Golden Hedging Honeysuckle) Medium sized evergreen shrub with very small golden leaves makes an excellent tidy formal hedge, a smaller growing more compact variety. Shade tolerant but best in full sun to ensure vibrant colouring. Suitable for hedges 30-100cm. Grows 15-25cm per year. Trim in spring or autumn.	15/25cm P 1.6 litre 25/40cm P 1.6 litre	3-4 3-4	4.59 5.79	4.39 5.59	4.19 5.29	3.99 4.99
Maple Field <i>Acer Campestre</i>	A picturesque medium sized deciduous native tree. The green leaves turn a beautiful clear golden yellow in autumn, tolerant of both chalk and limestone soils. Small greenish yellow flowers in spring are followed by winged seeds. Frequently seen in native hedgerows. Suitable for hedges 120cm and upwards. Grows 30-60cm per year. Trim in winter.	60/90cm P 2 litre 90/120cm P 2 litre 120/150cm P 4 litre 150/175cm P 4 litre 175/200cm P 6 litre	3-5 3-5 3-4 3 3	4.59 5.79 9.29 11.69 14.99	4.39 5.59 8.89 10.99 14.39	4.19 5.29 8.39 10.49 13.69	3.99 4.99 7.99 9.99 12.99
Mock Orange <i>Philadelphus</i>	Easy to grow deciduous shrubs producing masses of very scented white flowers during June and July. Tolerant of almost any soil in sun or shade. These varieties make a lovely fragrant addition to any border, or as an informal flowering hedge significantly smaller than <i>Philadelphus 'Virginal'</i> on Page 11. Trim after flowering.						
<i>Belle Etoile</i>	Large single white flowers with maroon centres. Very fragrant. Suitable for hedges 100-150cm.	30/50cm P 2 litre	3	5.79	5.59	5.29	4.99
Osmanthus Burkwoodii <i>Osmanthus x Burkwoodii</i>	Large evergreen shrub, slow growing compact habit. Masses of very fragrant white flowers seem to fill the whole garden with their rich scent in spring. Small glossy dark green leaves. Not suited to cold exposed sites. Suitable for hedges 90-200cm. Grows 15cm per year. Trim after flowering.	30/40cm P 2 litre 40/60cm P 2 litre 60/80cm P 5 litre 80/100cm P 5 litre	3 3 2-3 2-3	5.79 6.99 10.49 12.99	5.59 6.59 9.99 12.19	5.29 6.29 9.49 11.59	4.99 5.99 8.99 10.99
Perovskia Blue Spire <i>Russian Sage</i>	Small deciduous sub-shrub of upright growing habit and grey-white stems. Deeply cut grey green leaves and a profusion of violet blue flower spikes are produced in late summer and autumn providing a valuable late season colour for the garden. Requires a sunny spot in well drained soil. Makes a very attractive informal hedge growing up to 120cm. Trim to near ground level in spring.	20/30cm P 2 litre	3-5	4.59	4.39	4.19	3.99
Photinia Little Red Robin	A delightful smaller leaved and compact version of the usual Red Robin, the attractive bright red colouring of the new foliage often stays through much of the summer growing up to 1 metre. Grows 10-15cm per year, trim in spring.	15/20cm P 9cm 20/30cm P 3 litre 30/40cm P 5 litre	3-5 3-4 3	3.09 6.99 10.49	2.99 6.59 9.99	2.89 6.29 9.49	2.79 5.99 8.99
Photinia Red Robin	Large dense evergreen shrub with glossy dark green leaves which are a brilliant red when young, white flowers in spring. Makes an excellent colourful hedge. Not suited to very cold exposed situations. Suitable for hedges 120-250cm. Grows 30cm per year. Trim in spring.	15/25cm P 9cm 30/40cm P 2 litre 40/60cm P 2 litre 60/80cm P 2 litre 60/80cm P 3 litre 80/100cm P 3 litre 80/100cm P 5 litre 100/120cm P 5 litre 120/150cm P 5 litre 100/125cm P 7.5 litre 125/150cm P 7.5 litre 150/175cm P 15 litre 175/200cm P 15 litre	3-5 3-4 3-4 3-4 3 3 3 3 2 2 2 2 2	3.09 4.59 5.79 6.99 7.99 9.29 12.99 15.99 19.79 22.99 28.99 34.99 40.99	2.99 4.39 5.59 6.59 7.69 8.89 12.19 15.39 18.79 21.99 27.59 32.99 38.59	2.89 4.19 5.29 6.29 7.39 8.39 11.59 14.69 17.89 20.99 26.29 31.49 36.79	2.79 3.99 4.99 5.99 6.99 7.99 10.99 13.99 16.99 19.99 24.99 29.99 34.99
Pine Scots <i>Pinus Sylvestris</i>	Large native conifer with blue green needles supporting a wide variety of wildlife, these familiar evergreen trees have a variety of uses, they have great ornamental value as specimen trees as well as shelter belts/windbreaks. They have distinctive female cones that take 2-3 years to ripen. A tough plant suited to any soil or situation except coastal. Grows 30-50cm per year.	40/60cm P 2 litre 60/90cm P 5 litre 90/120cm P 5 litre 100/125cm P 15 litre 125/150cm P 15 litre	3 3 3 3 3	5.79 10.49 14.99 22.99 28.99	5.59 9.99 14.39 21.99 27.59	5.29 9.49 13.69 20.99 26.29	4.99 8.99 12.99 19.99 24.99
Plum - Shrub Varieties	We offer these shrubby varieties of ornamental plums, all will produce a good show of flowers in spring and have very ornamental foliage making remarkable, colourful hedges. Trim after flowering.						
<i>Crimson Dwarf</i> (<i>Prunus x cistena</i>)	A fantastic little shrub with oval red young growth that matures to a rich purple-red. Masses of solitary bowl shaped white flowers are followed by dark red cherry like fruits. Bushy growth, great in borders and for hedging. Grows up to 120cm.	30/50cm P 3 litre	3-5	7.99	7.69	7.39	6.99
<i>Plum Purple Leaved</i> (<i>Prunus cerasifera 'Nigra'</i>)	Deep purple /black foliage and stems with large numbers of contrasting pink flowers in March and April. Makes a fine and colourful hedge of between 100 and 200cm. Can also be mixed with the green leaved Myrobalan Plum (Page 11) to give a tapestry effect in which case we would recommend a ratio of one Myrobalan Plum to two (less vigorous) Purple Leaved Plums.	50/80cm P 3 litre	3-5	6.99	6.59	6.29	5.99
Privet Green <i>Ligustrum Ovalifolium</i>	This large semi evergreen shrub makes an excellent fast growing dense hedge, tolerant of shade and poor soil. Medium sized dark green leaves and fragrant white flowers in summer. Shade tolerant. Suitable for hedges 90-300cm. Grows 30cm per year. May be trimmed at any time.	40/60cm P 2 litre 60/80cm P 2 litre 80/100cm P 2 litre 100/120cm P 4 litre 120/150cm P 4 litre 120/150cm P 10 litre 150/175cm P 10 litre 175/200cm P 15 litre 120/150cm RB 150/175cm RB 175/200cm RB 200/225cm RB	3-5 3-5 3-5 3-4 3-4 2-3 2-3 2 2 2 2 2	4.39 4.99 5.79 9.29 11.59 17.39 22.99 28.99 22.99 31.29 38.49 45.99	4.19 4.79 5.59 8.89 10.99 16.49 21.99 27.59 21.99 29.79 36.39 43.99	3.99 4.59 5.29 8.39 9.99 15.79 20.99 26.29 20.99 28.39 34.69 41.99	3.79 4.39 4.99 7.99 9.99 14.99 19.99 24.99 19.99 26.99 32.99 39.99
Privet Golden <i>Ligustrum Ovalifolium Aureum</i>	Large semi evergreen shrub, like green privet but with rich gold markings on the foliage. Shade tolerant. Marginally slower growing than green privet. Suitable for hedges 90-300cm. Grows 30cm per year. May be trimmed at any time.	40/60cm P 2 litre 60/80cm P 2 litre 80/100cm P 2 litre 90/120cm P 4 litre 120/150cm P 4 litre 120/150cm P 10 litre 150/175cm P 10 litre	3-5 3-5 3-5 3-4 3-4 2-3 2-3	4.59 5.79 6.99 9.99 11.99 17.39 22.99	4.39 5.59 6.59 9.49 11.49 16.49 21.99	4.19 5.29 6.29 8.99 10.99 15.79 20.99	3.99 4.99 5.99 8.49 10.49 14.99 19.99
Privet Wild <i>Ligustrum Vulgare</i>	Large semi-evergreen shrub, shiny green leaves and white flowers followed by black fruits in autumn. May lose its leaves in harsh winters. Useful in mixed hedges, attracts wildlife. Grows 30cm per year. May be trimmed at any time.	60/90cm P 2 litre 90/120cm P 2 litre	3-5 3-5	4.59 5.79	4.39 5.59	4.19 5.29	3.99 4.99
Pyracantha	Large prickly evergreen shrubs with flowers in June and a profusion of berries in autumn and winter. Forms a very effective impenetrable barrier. Shade tolerant. Suitable for hedges 120-300cm. Grows 30-60cm per year. Trim in late winter.						
<i>Orange (P. Mohave)</i>	White flowers followed by orange berries in autumn.	40/60cm P 1.6 litre	3-4	4.99	4.79	4.59	4.39

		175/200cm P 10 litre	2-3	20.89	19.79	18.89	17.99
200/225cm P 10 litre	2-3	22.99	21.99	20.99	19.99		
Rosemary <i>Rosmarinus Officinalis</i>	Small evergreen shrub with narrow aromatic green leaves with white undersides. Blue flowers in spring are produced on the old wood. Arp is a robust new variety with improved winter hardiness. Useful for a low formal or informal hedge. Also used as a culinary herb. Requires full sun and well drained soil. Suitable for hedges 60-150cm. Grows 15-30cm per year. Trim in spring.	25/40cm P 2 litre	3-5	4.59	4.39	4.19	3.99
		40/60cm P 5 litre	3	9.29	8.89	8.39	7.99
Spindle <i>Euonymus Europaeus</i>	Large native deciduous shrub or small tree, fast growing with green stems and leaves. The tiny flowers are followed by very colourful red fruits and red autumn foliage. Frequently seen in country hedgerows particularly on chalk. Grows 30-60cm per year.	60/90cm P 2 litre	3-5	4.59	4.39	4.19	3.99
		90/120cm P 2 litre	3-5	5.99	5.79	5.59	4.99
		120/150cm P 4 litre	3-4	9.29	8.89	8.39	7.99
Sweet Box <i>Sarcococca Confusa</i>	A super little shade tolerant evergreen. The pointed oval leaves are a deep glossy green highlighting the exquisitely fragrant tiny white flowers when they appear in late winter. Can be grown as a small evergreen hedge as a substitute for Box, especially if blight is a problem, or simply planted near doorways, gates or anywhere in good soil where the fragrance of the flowers can be enjoyed. Shade tolerant. Suitable for hedges up to 75cm. Grows 10cm per year. Trim as required.	12/20cm P 9cm	4-6	3.09	2.99	2.89	2.79
		20/30cm P 2 litre	3-5	6.99	6.59	6.29	5.99
		30/50cm P 5 litre	3				
Thuja Brabant <i>Thuja occidentalis 'Brabant'</i>	Large evergreen conifer with glossy dark green foliage, fast growing upright bushy habit. Will make a splendid hedge or screen and is tolerant of shade, shallow chalky and moist soils. A good alternative to Green Leylandii as it is slower growing (therefore more easily maintained) and will also regenerate when pruned back into older wood. Suitable for hedges 150cms(5ft) and upwards. A tough and hardy variety.	60/90cm P 2 litre	2-3	4.59	4.39	4.19	3.99
Thuja Plicata Atrovirens <i>Western Red Cedar</i>	Large evergreen conifer with glossy dark green aromatic foliage, fast growing upright bushy habit. Will make a splendid hedge or screen and is tolerant of shade, shallow chalky and moist soils. A good alternative to Green Leylandii as it is slower growing (therefore more easily maintained) and will also regenerate when pruned back into older wood. Suitable for hedges 150cm upwards. Grows 40-60cm per year. Trim in autumn.	20/30cm P 9cm	3-5	2.59	2.49	2.39	2.29
		60/80cm P 2 litre	2-3	4.59	4.39	4.19	3.99

175/200cm RB	2	33.59	31.99	30.49	28.99		
Viburnum <i>Bodnantense Dawn</i>	Reliable hardy flowering shrubs suitable for any reasonable soil in sun or part shade.						
Opulus Roseum <i>(Snowball Bush)</i>	This is an ornamental variety of 'Guelder Rose' (Page 11), a deciduous shrub with maple-like lobed foliage that turns rich hues of purple and red in autumn. Produces large rounded heads of creamy white flowers in early summer, one of the most attractive flowering shrubs and will make a very remarkable flowering hedge of 150-200cm high. Trim after flowering.	40/60cm P 3 litre	3	6.99	6.59	6.29	5.99
Viburnum Tinus <i>(Lauristinus)</i>	Large evergreen shrub of bushy habit. Glossy dark green foliage, white flower heads develop from pink buds over an extended period from November to May. Shade tolerant and suitable for windy and coastal sites. Makes an excellent informal hedge or as a shrub in its own right particularly under deciduous trees. Suitable for hedges 120-250cm. Grows 20-30cm per year. Trim in spring.	20/30cm P 2 litre	3-5	4.59	4.39	4.19	3.99
		30/40cm P 2 litre	3-4	5.99	5.79	5.59	4.99

Yew English <i>Taxus Baccata</i>	Large evergreen native conifer frequently seen in churchyards, native stands of this plant occur in chalky areas. The aristocrat of hedging plants, highly suitable for all hedges, screens and topiary. A very dense growing shade tolerant plant with fleshy red fruits. Although all parts of this plant are poisonous to stock and humans the foliage is now used to produce cancer beating drugs. A very hardy plant that will grow in any situation providing the soil is well drained. Slow growing but can be greatly hastened with good soil preparation. Suitable for hedges 30cm and upwards. Grows 15-30cm per year. Trim in autumn. Also available as instant hedging on Pages 28-29.	20/30cm P 9cm	4-6	2.59	2.49	2.39	2.29

Native Hedge Mixes

See our website for Special Offers & Pack Deals

The last few decades has seen the demise of many miles of established hedgerows and their associated wildlife. To help redress this balance we are offering a range of hedgerow mixes to suit all purposes and budgets. These will grow together to form a dense intruder proof hedge or boundary that will be stockproof (except for the thornless mix) and will support a wide variety of wildlife.

Hedge height – All of our hedgerow mixes are suitable for hedges of 120cm upwards.

Trimming – We recommend trimming your mixed hedge at anytime from August onwards, ideally in winter.

How many plants? – For a single row hedge we recommend planting at 3 plants per metre (33cm/13ins apart) or 5 plants per metre for a staggered double row with 40cm/16ins between plants and 40cm/16ins between the 2 rows as shown below.

To make an extra dense, bushy hedge it is possible to increase the number of plants up to 7 per metre, especially if smaller plants (up to 60/90cm) are used in which case staggered rows should be planted as above but with 28cm/11ins between the plants.

All our hedgerow mixes are supplied bare-rooted from November to early April except for the potted plants at the bottom of the page that may be planted all year round. Please note-we will always include a good selection of species within your order but we cannot accept requests for specific plants. To be certain of including or excluding a particular plant please do order separately.

Our hedgerow plants are sold in multiples of 10 and our minimum order is 20 plants of any particular mix.

We strongly recommend 'Rootgrow' (Page 4) to get your new native hedge off to a great start.

		Size(s) Available	Price/plant for qty shown

Hopes Grove Economy Native Hedgerow Mix	An economical mix of species where cost is the main consideration, especially where large quantities are contemplated. We sell hundreds of thousands of this tried and tested stock proof mix to our farming customers every year. Comprising 75% Quickthorn to knit the hedge together, the balance is selected with a minimum of 5 species from the following, Alder, Blackthorn, Dog Rose, Dogwood, Field Maple, Hazel and Spindle.	40/60cm BR	0.89	0.46	0.39
		60/80cm BR	1.09	0.64	0.55
		60/90cm TR	1.39	0.79	0.69
		90/120cm TR	1.79	1.02	0.89
		100/125cm FW	2.49	1.25	1.09
Hopes Grove Special Native Mix	The widest ranging and most interesting mix available from any supplier when tested by Gardening Which. A very popular mix to give year round interest and variety with catkins, flower, fruits and berries and autumn foliage. The mixture comprises 50% Quickthorn and 25% Blackthorn to knit the hedge together, the balance is drawn from Common Alder, Common Dogwood, Field Maple, Guelder Rose, Hazel, Wild Privet, Dog Rose, Scotch Rose, Sweet Briar, Spindle, Wayfaring Tree and Wild Crabapple. Available as 2-3ft and 3-4ft transplants.	60/90cm TR	1.49	0.91	0.79
		90/120cm TR	1.99	1.14	0.99
		100/125cm FW	2.79	1.36	1.19
		60/90cm P2litre	4.49	4.29	4.09
		90/120cm P2 litre	4.99	4.69	4.39
		120/150cm P4 litre	8.99	8.49	7.99

175/200cm P10 litre	19.79	18.89	17.99		
Hopes Grove Larger Native Plant Mix	A mixture of taller plants for customers requiring a more instant effect. As many hedgerow plants will not transplant successfully at these larger sizes we have restricted the mix to the reliable, proven species. The mixture comprises 75% Quickthorn with the balance normally selected from Common Alder, Field Maple, Hornbeam, Spindle and Wild Crabapple. We may occasionally supply this mixture with a large or smaller number of species than listed depending on the stock available at the time of order.	125/150cm FW	2.89	1.98	1.79
		150/175cm FW	4.49	3.29	2.89
Hopes Grove Thornless Native Hedge Mix	An attractive, wildlife friendly mix of hedgerow natives for any situation where thorns are undesirable, especially next to public rights of way etc. Our mixture is made up from the following plants 25% Hornbeam, 25% Field Maple, 25% Hazel and 25% selected (minimum of 5 species) from the following Dogwood, Spindle, Wild Crabapple, Guelder Rose, Wild Privet and Common Alder.	60/100cm TR	1.49	0.91	0.79
		100/125cm FW	2.79	1.64	1.45
Hopes Grove Privacy Native Hedgerow Mix	A native hedgerow mix carefully selected to give as much privacy as possible without using more 'suburban' hedging plants. Our privacy mix relies on leaf retaining Beech and Hornbeam together with Quickthorn to 'knit' the hedge together. Our mix comprises 25% Quickthorn, 25% Hornbeam, 25% Green Beech with the balance selected from Blackthorn, Dogwood, Field Maple, Guelder Rose, Spindle, Dog Rose and Wild Crabapple. (Other evergreen native hedge plants could be ordered separately and interspersed with this mix to give extra coverage in winter, for example Green Holly (Page 19) Gorse (Page 19) . English Yew (Page 13 and 27) could also be included if the hedge is well away from farm animals and horses.)	60/100cm TR	1.49	0.91	0.79
		100/125cm FW	2.79	1.64	1.45
Hopes Grove Edible Hedgerow Mix	Our specially selected mixture of hedgerow plants will provide a varied annual crop of nuts, hips and berries suitable for making jams, syrups,(sloe gins!) and for eating fresh. These plants will knit together to make a dense hedge that is both stock proof and will support a wide variety of wildlife. Our edible hedgerow mix comprises 25% Quickthorn, 25% Blackthorn, 25% Hazel with the balance (minimum 5 species) selected from the following Wild Pear, Dog Rose, Elder, Wild Crabapple, Myrobalan Plum and Amelanchier.	60/100cm TR	1.49	0.91	0.79
Hopes Grove Coastal Hedgerow Mix	Our coastal hedgerow mix has been specially formulated to thrive in the harsh salt laden windy conditions near the coast. These plants will knit together to produce a hardy stockproof hedge with many flowers and berries providing excellent wildlife value. Coastal hedgerow mix comprises 25% Quickthorn, 25% Blackthorn, 25% Field Maple with the balance selected from Dog Rose, Sea Buckthorn, Scotch rose, Wild Privet, Elder and Cotoneaster.	60/100cm TR	1.49	0.91	0.79
Hopes Grove Bird Friendly Hedgerow Mix	A rich mixture of up to ten native species that are particularly useful for birds and will also grow into a dense intruder proof hedgerow, not only encouraging birds but also many other forms of wildlife into your garden. Our bird friendly hedge mix comprises 25% Quickthorn, 25% Blackthorn, 25% Field Maple with the remaining 25% (minimum 5 species) drawn from Common Alder, Bird Cherry, Wayfaring Tree, Myrobalan Plum, Guelder Rose, Hazel and Dog Rose.	60/100cm TR	1.49	0.91	0.79
		100/125cm FW	2.79	1.64	1.45
Hopes Grove Flowering Hedgerow Mix	A natural stock and burglar proof hedge with a twist, this mix of species will provide flowers for much of the season, not to mention colourful hips, berries and autumn foliage later in the season. Our flowering hedge mix comprises 25% Quickthorn, 25% Blackthorn, 25% Rugosa Roses (Red and White) with the balance (minimum 5 species) drawn from Amelanchier, Dog Rose, Elder, Myrobalan Plum, Guelder Rose and Wild Crabapple.	60/100cm TR	1.49	0.91	0.79

Instant Hedging CONTAINER GROWN

Trough Hedging

We grow a wide range of species in convenient 1 metre sections, these are young hedging products that have been trimmed several times, while being comparatively easy to handle and economically priced they give a good landscape impact immediately on planting.

Our Trough hedges are quick to plant and will produce an excellent dense and bushy hedge as they have already been correctly pre spaced, planting takes less than half the time compared to using individual plants. Hedge troughs can also be bent or cut to accommodate almost any shape.

Our hedge troughs are available all year round, sizes and prices can be found in the instant hedging section of our website, species include green and golden privet, English yew, green and purple beech, hornbeam, common box, griselinia, quickthorn, Portuguese laurel, lonicera nitida and mixed native hedging.

We recommend using the soaker hose on page 4 to give your new instant hedge the best

Instant Hedging FIELD GROWN HEDGING ELEMENTS

Hedging Elements

These field grown plants are a larger grade of Instant Pre-formed hedging that have been precisely trimmed for several years to give an instant, mature 'show garden' look and a high degree of privacy.

The root system is also pruned regularly throughout the production process, this produces a compact, fibrous root system that facilitates transplanting at any time of year. (These are the only field grown plants in our catalogue that are available 12 months of the year!)

Hedging elements are sold in 1 metre sections (each section contains 4 plants) and supplied in biodegradable cardboard troughs which are planted with the hedge. Each 1 metre section weighs around 150kgs and so assistance is required with handling and planting.

Hedging elements are supplied complete with a drip irrigation kit made to the size of hedge ordered and included in the price.

Hedging elements are available in a wide range of species in heights from 80cm - 200cm. Full availability and prices may be found on our website, for larger orders of 50 metres or more we offer tailored quotes with further discounts to the prices shown.

Order Preparation

Growing Fields

200cm Hornbeam Hedge Elements

Instant Hedging HEDGE UNITS

These are the largest and tallest grade of instant hedging available. Hedge units are usually rootballed plants that have been grown 'individually' and trimmed at the sides to produce a dense bushy plant in a pre-formed columnar shape. These may be planted together to give the effect of an instant hedge with immediate privacy in heights up to 250cms.

Hedge units are available in a wide range of sizes the smaller, younger plants represent a more intermediate (and cost effective) type of instant hedging that are substantially 'fuller' and more developed than normal rootballed plants. These will require up to 3 plants per metre to give a good degree of coverage at the time of planting and give full coverage within a year or so in reasonable conditions.

Larger fully formed block shaped hedging units that give full coverage immediately in sizes up to 70cm x 70cm x 250cm high. These are an ideal solution where complete privacy and height are essential. Each plant can weigh up to 150kg and so assistance with planting and handling is required.

Hedge units are available from October – April. Full availability and prices may be found on our website and we offer further discounts for larger quantities.

Azaleas & Rhododendrons

AZALEAS AND RHODODENDRONS Available October - April

These showy plants can be relied on to produce a stunning display of flowers in the spring, all require a moist but well drained lime free soil with plenty of leaf mould or similar organic matter incorporated. They are surface rooting plants and can however be grown in most soils if generous quantities of peat are added at the time of planting and as an annual top dressing, applications of sequestered iron are also helpful where lime is present. All will be supplied as strong 'chunky' three year old budded plants in 4 and 5 litre pots and will be between 30 and 60cm in height depending on growth habits

AZALEAS

Deciduous Varieties These stunning shrubs come alive in May with a profusion of brightly coloured trumpet shaped flowers in a variety of shades, few shrubs produce such a wealth of colour. These plants also have beautiful autumn colours of yellow, orange and red. All are slow growing and will gradually attain a height of around 150cm. Supplied in 4 litre pots. All **£15.79 each** • Any 5 or more **£14.29 each**

Fireball	Deep orange-red, copper red growing foliage
Golden Eagle	Reddish-orange with orange/yellow veins and vivid orange blotches. Very attractive.
Harvest Moon	Straw yellow with chrome yellow flare, scented.
Homebush	Deep rose pink with paler shading, semi double flowers. Very attractive.
Hotspur	Dazzling flame red with deeper markings in the upper petals.
Pontica (Azalea pontica, Rhododendron luteum)	Superb plant with large rounded trusses of strongly fragrant yellow flowers in May.
Satan	Bright geranium red flowers open from darker buds
Whitethroat	Delightful pure white semi double flowers

Evergreen Varieties Small leaved evergreen shrubs producing a tapestry of colour in May, they are compact and rarely exceed one metre in height. Evergreen Azaleas are extremely versatile, suitable for beds and borders, informal hedges and as informal hedges. In most situations these varieties will grow to around 180cm x 180cm. Supplied in 4 litre pots. All **£13.99 each** • Any 5 or more **£12.79 each**

Addy Werry	Deep vermilion red flowers
Adonis	Frilly edged white flowers
Amoena	Masses of light purple flowers
Blaauws Pink	Salmon pink flowers with paler shading
Blue Danube	Very distinctive variety with striking bluish-violet flowers
Geisha Red	Deep purple red, very hardy
Geisha Purple	Mound forming variety with rich purple flowers
Mothers Day	Deep red with darker red blotches
Silvester	Purple red flowers with paler margins
Stewartsonian	Vivid red, reddish foliage in winter

LARGE FLOWERED RHODODENDRONS

These larger growing varieties are unsurpassed for the beauty of their large flower trusses, they are equally at home in the dappled (not dense) shade of woodland plantings or in full sun. Ideal as specimens or for massed plantings where space allows and as informal hedges. In most situations these varieties will grow to around 180cm x 180cm. Supplied in 5 litre pots. All **£18.49 each** • Any 5 or more **£16.99 each**

Albert Schweitzer	Rosy red with a deeper red blotch
Anna Rose Whitney	Deep rose pink with brown spots borne in dense rounded trusses
Cheer	Purplish-pink with red spots and red blotch. Tough
Christmas Cheer	Pink flowers fading to white, bushy growth. Flowers March
Cosmopolitan	Pale pink with deeper red flare
Cunninghams Blush	Reliable variety with the most delicate blush pink flowers that contrast perfectly with the deep green foliage.
Cunningham White	Pale mauve fading to white with yellow, brown and purple spots.
Delta	Bushy variety producing dense clusters of bright pink flowers
Germania	Large deep pink flowers
Goldflimmer	Compact lilac with central gold leaf variegation
Gomer Waterer	White flowers flushed pale mauve with a mustard basal blotch. Bushy growth.
Halfdan Lem	Robust strong grower with deep green foliage and large trusses of bright red flowers.
Horizon Monarch	Very large warm yellow flowers with red markings open from red buds
Kokardia	Frilly lavender pink flowers with a prominent wine red blotch
Lees Dark Purple	Royal purple with ochre markings
Lord Roberts	A robust upright growing variety with dark crimson flowers that have extensive black markings
Madame Masson	Trusses of white flowers with a yellow basal blotch
Marie Forte	Dense bushy cultivar, rich deep rosy flowers with darker markings on large clusters
Markeeta's Prize	Rich dark green foliage and large scarlet flowers with darker red spots
Mosers Maroon	Strong grower with maroon-red flowers that have darker markings
Nova Zembla	Deep red flowers with a darker blotch
Ponticum Roseum Elegans	Large trusses of clear lilac-pink
Red Jack	A reliable variety producing attractive ruby-red flowers. Bushy growth
Rocket	Rosy pink flower trusses
Scintillation	Pink flowers with bronze flare in large rounded trusses
Scyphocalix	A spreading compact variety, unusual flower clusters are vivid pink with a gold throat
Virginia Richards	Large pale orange flushed pink flowers with wavy edges
Wilgens Ruby	Deep red with darker spots
Wilgens Surprise	Deep Rosy flowers with chocolate brown markings. Healthy deep green foliage, bushy growth

Ground Cover Plants *Alchemilla - Verbena*

Our ground cover plants make an excellent way of reducing maintenance without compromising on colour and interest, we have varieties suitable for all situations from dense shade to full sun. Planting distances are very much a matter of personal choice and budget but as a rough guide – 4 plants per square metre is adequate if you are patient, 6 per square metre will give better coverage while 9-12 plants per square metre will make a weed suppressing carpet very quickly.

		Size(s) Available	Price/plant for qty shown (All prices exclude VAT) 1-4 5-24 25-99 100+			
Alchemilla Mollis (Lady's mantle) 🌱	This wonderful little clump forming plant deserves to be a part of every garden. The scalloped fresh green leaves are brought to life by the tiny water droplets they trap, catching and reflecting the sunlight. Throughout the summer months the Lady's mantle is topped by a frothy foam of chartreuse yellow flower sprays. A great ground cover plant for lining paths and other areas, highly valued by garden designers as Alchemilla makes a great foil for stronger colours and seems to go well with just about anything! A tough and resilient plant that does well in most situations and is very drought tolerant once established. 60cm	P1.5litre	4.29	3.99	3.79	3.59
Anemone (Japanese Anemone)	These easy to grow plants never fail to delight, when much of the garden is past its best Anemones open into a succession of saucer shaped blooms from August until October, held on strong and wiry stems so that staking is unnecessary. Grow them in full sun or part shade, cut down old stems after flowering.	P2litre	4.99	4.79	4.59	4.39
Honorine Jobert 🌱	(Anemone x Hybrida 'Honorine Jobert') Along succession of yellow centred pure-white flowers from mid-summer until late autumn. Anemone Honorine Jobert is a great late season plant that is really at its best when most other perennials have finished flowering. 120cm.					
Prince Heinrich	(Anemone hupehensis var japonica 'Prince Heinrich') This darker pink Anemone produces semi double flowers with slightly quilled/curled petals above a clump of green foliage from mid-Summer until Autumn. 75cm.					
September Charm 🌱	(Anemone x hybrida 'September Charm') One of the best plants for Autumn colour, September Charm has larger yellow-centred pink flowers borne on wiry stems above rich green foliage, very prolific and tough. 90cm.					
Aster (Aster dumosus, Aster novi-belgii)	A great Autumn plant, we have a selection of these hardy low growing 'Michaelmas Daisies', growing to just 30cm or so they are clothed in flowers from late summer onwards when colour in the garden can be in short supply. Asters are easy to grow in any reasonable soil in sun or partial shade where they will steadily spread providing colour for many years. A good plant for both bees and butterflies.	P2litre	4.99	4.79	4.59	4.39
Alice Haslam'	(Aster novi-belgii 'Alice Haslam') Masses of deep rose-pink flowers with yellow centres on compact plants growing to 25cm.					
'Apollo'	(Aster dumosus 'Apollo') Long lasting white star shaped flowers each with a yellow centre, 40cm.					
'Lady in Blue'	(Aster novi-belgii 'Lady in Blue') Gorgeous powder-blue flowers with yellow centres sit above a neat rosette of foliage. 30cm.					
Marjorie'	(Aster dumosus 'Marjorie') Bushy low growing variety with masses of pale pink, yellow centred flowers throughout the Autumn. 30cm.					
Bergenia Cordifolia 'Purpurea' (Elephants ears)	Bergenia was a recurring plant in Gertrude Jekyll's garden designs and it is easy to see why, this useful evergreen herbaceous plant has bold red flushed architectural foliage that turns to various shades of rich purple during the winter months, this colouration is more dramatic in poor soils. During late winter and spring masses of strong wiry stems erupt from the foliage carrying clusters of rich cerise-pink flowers. Bergenia is a tough and adaptable plant that will tolerate any soil in full sun or partial shade.	P1.5litre	4.29	3.99	3.79	3.59
Catmint, Small Nepeta x faassenii	This wonderful little perennial has an enduring popularity in British gardens, the neat little clumps of aromatic grey-green foliage supports a profusion of flower stems clothed with Lavender blue flowers that are adored by bees. The flowers appear from late May right through until the autumn making Nepeta an excellent companion to Roses, they are a good plant for lining paths where the cascade of foliage and flowers will soften edges and fill the air with their aroma, particularly when crushed by passing feet. Best in full sun, prefers a well-drained soil. 45cm.	P1.5litre	4.29	3.99	3.79	3.59
Catmint, Giant Nepeta 'Six Hills Giant'	The larger growing Catmint, much bolder clumps of grey-green aromatic foliage are topped by a riot of lavender blue flowers held on upright stems throughout the summer months. These are great plants for a sunny flower borders or amongst larger roses or paired with silver leaved plants, plant them near paths or close to the house so the aroma can be appreciated, especially after summer rain. Best in full sun, prefers a well-drained soil. 70cm.	P1.5litre	4.29	3.99	3.79	3.59
Cotoneaster Coral Beauty Cotoneaster x suecicus 'Coral Beauty'	These evergreen shrubs are great for low maintenance gardening, once established they will grow into a dense weed suppressing mat of tiny evergreen leaves. In spring the low growing branches come alive with a smothering of tiny creamy white star-shaped flowers that are loved by bees. Later in the season the branches are studded with an abundance colourful orange-red berries that will attract birds into the garden. Perfect ground cover in any well drained soil, Cotoneaster Coral Beauty is particularly good for covering difficult shady areas under trees and around shrubs. 60cm.	P1.5litre	4.29	3.99	3.79	3.59
Cotoneaster Dammeri Cotoneaster dammeri	This is the very low growing prostrate Cotoneaster, growing to no taller than 20cm or so. Cotoneaster dammeri has deep green oval shaped evergreen leaves on long trailing shoots. Masses of creamy white flowers open from pale pink buds that smother the plants in spring and develop into very colourful fruits in autumn, in colour they are best described as sealing wax red. One of the very best evergreen ground cover plants, perfect underneath larger shrubs or for covering banks and other areas where a weed suppressing carpet of foliage would be desirable.	P1.5litre	4.29	3.99	3.79	3.59
Hardy Geranium (Cranesbill)	Needing little introduction, Hardy Geraniums are indispensable around Roses and in perennial borders, they also make an effective ground cover solution in many other situations. Geraniums will tolerate most soils provided they are not waterlogged and will give good coverage in sun or partial shade where they will steadily increase into a weed suppressing carpet of foliage. All will flower in early to midsummer, often producing more flowers intermittently until autumn, especially if deadheaded.	P2litre	4.99	4.79	4.59	4.39
Himalayense 'Gravetye'	(Geranium himalayense 'Gravetye') Distinctive fern-like mid green foliage that spreads, the large saucer shaped flowers are violet-blue with a lighter centre, the first and biggest flush in June and then intermittently through until Autumn. 45cm.					
'Lavender Pinwheel'	(Geranium phaeum 'Lavender Pinwheel') A beautifully curious variety, the lavender-white flowers have darker veins and edgings held above fresh green foliage that has darker chocolate markings.					
Phaeum	(Geranium phaeum, Dusky Cranesbill) A strong growing species with distinctive purple-black flowers and a strong and attractive clump of divided foliage, sometime with chocolate coloured markings. One of the best for shade. 80cm.					
Phaeum Album	(Geranium phaeum 'Album', Dusky Cranesbill) A good plant in shade, the perfect small white flowers are held above a bold clump of foliage with attractive chocolate coloured markings.					
Rosemoor	(Geranium x magnificum 'Rosemoor') The fresh green deeply divided foliage covers quickly, the saucer shaped flowers are produced in clusters, violet with deeper coloured veins. Better in full sun. 40cm.					
Spish Splash	(Geranium pratense 'Spish Splash') The randomly patterned flowers are white - splashed, striped and speckled with lilac and purple above green foliage. 50cm					
Wargrave Pink	(Geranium x oxonianum 'Wargrave Pink') A tried and tested favourite with vigorous growth and a long flowering season. The flowers are salmon pink at first, fading with age and are produced from spring right through until autumn above divided evergreen foliage. 60cm					
Hypericum Calycinum Rose of Sharon	A widely planted, carpeting evergreen valued for its ability to colonise difficult dry and shady areas of the garden. Its dark green foliage contrasts against the large star shaped golden yellow flowers that appear in succession throughout the summer and autumn. Easy to grow in any reasonable soil that does not become waterlogged and is very drought tolerant once established, great for suppressing weeds in all manner of difficult areas such as shady banks and around larger shrubs and trees. 30cm.	P1.5litre	4.29	3.99	3.79	3.59
Periwinkle Vinca	Vinca's, commonly known as periwinkles are slender stemmed carpeting plants with glossy evergreen rounded leaves that will thrive in all aspects from full sun to the dense shade under large trees. Masses of the small flowers appear continuously from early spring until early summer (sometimes intermittently until autumn) nestled amongst the fresh green leaves. All of these varieties will quickly form a dense weed suppressing carpet in any reasonable soil, very drought tolerant once established. Greater Periwinkles (Vinca major varieties) have larger leaves up to 3cm or so in length and arching new stems. The Lesser Periwinkles (Vinca minor varieties) have significantly smaller leaves and form a lower carpet of foliage.	P1.5litre	4.29	3.99	3.79	3.59
Vinca Major	Fresh light green foliage when young deepening to glossy dark green on maturity, purple-blue flowers in succession growing to 45cm.					
Vinca major 'Variegata' 🌱	The glossy green foliage is blotched and margined with creamy white giving extra interest, purple blue flowers. 45cm					
Vinca minor 'Bowles Variety' 🌱	Beautiful azure blue flowers nestled amongst the small glossy deep green leaves. 10cm					
Vinca minor 'Gertrude Jekyll' 🌱	This selected variety has glistening pure white flowers that contrast with the deep green foliage. 10cm.					
Verbena bonariensis 🌱	A prolific and easy to grow perennial, during the summer months the tall upright stems (which never need staking) support tightly packed flat clusters of lavender purple flower heads that appear in succession from June until the autumn. A very popular plant with bees and butterflies and much used by garden designers, it has a 'transparent' habit making it suitable for the front, middle or back of a flower border despite its height. Any reasonable soil, 120cm.	P1.5litre	4.29	3.99	3.79	3.59

We hope you enjoy thumbing through these last few pages of our catalogue as much as we have enjoyed assembling this collection of plants! Photos of these and all of our plants as supplied may be viewed on our website.

		Size(s) Available	Per metre	Price/plant for qty shown (All prices exclude VAT)	
				1+	3+
Amelanchier 'Obelisk' <i>Amelanchier alnifolia</i> 'Obelisk'	A charming small tree of upright habit with elegantly upswept branches slowly developing into a gently fastigate profile. In mid to late spring the branches are clothed with a spectacular display of green centred white flowers. The rounded leaves are deep green for most of the season turning to rich hues of yellow and orange in the autumn before they fall exposing the purple-red fruits. An excellent small tree, especially for restricted spaces.	20/30CM P 9CM 60/80CM P 5 LITRE		8.99 19.99	7.19 15.99
Birch Jacquemontii <i>Betula utilis</i> 'Jacquemontii'	The Himalayan Birch is without doubt one of the best trees for winter interest, as the tree ages the bark becomes bright white, a great winter garden can be created with groups of Himalayan Birch combined with drifts of dogwoods (P9) and willows (P13). Himalayan Birches also make fine lawn specimens and look very handsome planted in woodland groups - or even plant three of our smaller 1 litre plants in the same hole and watch them grow into an impressive multi-stemmed specimen within a few years! Rich deep green foliage that turns to bright yellow in autumn. A tough, hardy and relatively fast growing tree.	60/100CM P 1 LITRE 60/80CM P 1 LITRE MULTISTEM 150/200CM P 5 LITRE 120/150CM P 5 LITRE MULTISTEM		10.99 10.99 24.99 24.99	8.79 8.79 19.99 19.99
Candy Floss Tree <i>Cercidiphyllum japonicum</i>	The small growing Candy Floss or Katsura tree is something of a gem that deserves to be more widely planted. The heart shaped leaves are satisfyingly arranged in pairs along the branches, in spring they emerge in hues of bronze and pink before turning to rich green in summer. As autumn progresses the foliage changes to hues of yellow, orange, Smokey pink and red while at the same time exuding a sweet burnt sugar smell from which the tree gets its name. Easy to grow in any good soil.	40/60CM P 9CM 120/150CM P 5 LITRE		5.99 19.99	4.79 15.99
Cherry, Ornamental Flowering	Flowering Cherries are generally smaller growing and very attractive deciduous trees grown mostly for the profusion of their spring blossom and bright autumn hues of their foliage. Most are excellent trees for smaller spaces and will grow happily in any well drained soil that is not too chalky.				
Autumn Flowering Cherry <i>Prunus subhirtella autumnalis 'rosea'</i>	The autumn flowering cherry produces a steady show of flowers intermittently (and mostly during milder weather) throughout the autumn and winter months with the show finally reaching a peak at the end in the spring. A relatively small tree of dense 'twiggy' habit that is easy to grow and will flower from the first season it is planted.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Cheals Weeping Cherry <i>Prunus 'kidu shidare zakura'</i>	A delightful and very small tree with graceful weeping branches that become clothed in deep pink powder puff flowers in late spring. The leaves emerge bronze coloured before turning to glossy green during summer. Rarely grows larger than 2.5 metres x 2.5metres.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Flagpole Cherry <i>Prunus 'amanogawa'</i>	The flagpole cherry is a small and highly architectural tree with a tight columnar habit. In spring the semi double shell pink flowers emerge from the branches in dense upright clusters. In autumn the leaves turn to colours of red, green and orange-yellow at the same time making this little tree something of an all-rounder.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Great White Cherry <i>Prunus 'taihaku'</i>	The Great white is a larger and more robust tree growing up to 12 metres producing very large brilliant white flowers (the largest of any cherry) in April and May complemented perfectly by the rich bronzy-red of the newly emerged leaves. Coppery red peeling bark on older trees and beautiful yellow and orange autumn colours make this a tree for all seasons. Some 300 of these trees are planted in the Cherry Orchard at Alnwick to great effect.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Kanzan Cherry <i>Prunus serrulata 'Kanzan'</i>	One of the most widely planted cherries, easily spotted with its distinctive vase shape comprised of stiffly ascending branches, becoming somewhat wider with age (like so many of us!). In spring the branches become clothed in a profusion of showy purple-pink flowers. The newly emerged leaves provide a perfect backdrop of coppery-red before turning to green and then shades of yellow and orange in autumn.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Royal Burgundy Cherry <i>Prunus serrulata 'Royal Burgundy'</i>	This small tree is effectively a burgundy-red leaved version of 'Kanzan' with a very similar growth habit and pendent clusters of rosy pink flowers which perfectly complement the newly emerged leaves, these turn a bronzy colour in autumn. After the leaves have dropped the peeling coppery coloured bark of older trees provides further interest.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Tibetan cherry <i>Prunus serrula</i>	A small but very robust tree with narrower willow-like leaves that turn to rich hues of buttery yellow as autumn progresses. The white bowl shaped flowers are rather less significant than those of other cherries. This gem of a little tree is grown for the beauty of its shining coppery-mahogany coloured bark on older trees which peels away in bands and is particularly decorative in winter.	100/150CM BR MDN 150/200CM P 10 LITRE		15.49 24.99	12.39 19.99
Cornus Kousa Chinensis <i>Flowering Dogwood</i>	Provides a spectacular display in early summer with its tiny flowers each surrounded by conspicuous creamy white bracts that change colour with age, strawberry like fruits develop later in the season. Slowly growing into large conical shrub to 6 metres. In Autumn the foliage provides a vivid tapestry of crimson and purple hues. Easy to grow in any good and well drained soil but not chalk.	30/40CM P 9CM 80/100CM P 5 LITRE		5.99 19.99	4.79 15.99
Crabapple, Ornamental <i>Malus</i>	Hardy and easily grown small trees cultivated for the beauty of their spring blossom during April and May and equally colourful displays of crabapples later in the year, these are often retained after the leaves have fallen in autumn and are very popular with birds. Any reasonable soil that does not become waterlogged.				
Golden Hornet Crabapple <i>Malus 'Golden Hornet'</i>	A delightful small tree that is clothed in a profusion of white flowers during April and May followed by heavy crops of bright yellow fruits that persist well into winter.	100/150CM BR MDN 150/175CM P 10 LITRE		15.49 24.99	12.39 19.99
John Downie Crabapple <i>Malus 'John Downie'</i>	Probably the best ornamental crabapple (and the best for jelly!). Masses of white flowers in late spring followed by good crops of comparatively large bright orange-red fruits.	100/150CM BR MDN 150/175CM P 10 LITRE		15.49 24.99	12.39 19.99
Royalty Crabapple <i>Malus 'Royalty'</i>	A lovely little upright growing tree with tapered glossy deep purple foliage that turns to hues of rich red in autumn. In late spring a profusion of quite large purple-crimson flowers emerge complementing the foliage perfectly. Dark red fruits.	100/150CM BR MDN 150/175CM P 10 LITRE		15.49 24.99	12.39 19.99
Davidia Involucrata <i>Pocket Handkerchief Tree, Dove Tree</i>	A prized ornamental tree grown for the beauty of its white bracts that surround the tiny flowers appearing in late spring, they are described variously as having the appearance of resting doves on the branches or as pure white handkerchiefs drying on the tree from which the common names are derived. Refreshingly, for such a beautiful tree, the Davidia is no Diva - it has no long list of must have cultural requirements any other particular fuss, just the best spot you can offer such a worthy plant, well prepared.	60/80CM P 3 LITRE		19.99	15.99
Elder, Ornamental	These are newer varieties of our native Elderberry (page 9) with very colourful deep purple foliage and contrasting richly coloured pink flower clusters. They are relatively large and easily grown shrubs and their decorative foliage ensures a long season of interest once flowering has finished. Tolerant of all soil types and may be hard pruned in spring to maintain both shape and the intensity of leaf colour.				
Black Lace <i>Sambucus nigra 'Black Lace'</i>	A delightful variety with deeply divided rich purple foliage rather like that of a Dissectum Japanese maple only with a much more robust constitution. In early summer a profusion of musk scented pink flushed elderflowers appear from creamy pink buds. The characteristic red-black elderberries appear later in the season and are very popular with birds (and winemakers!) 3 metres.	40/60CM P 5 LITRE		14.99	11.99
Black Tower <i>Sambucus nigra 'Black Tower'</i>	A large leaved and robust variety that grows naturally into a narrow slender column, the leaves emerge greenish-purple and quickly deepen in colour to a rich burgundy purple. The pink flushed flowers emerge in June in flattened sprays. An interesting and very architectural new plant that has the potential for creating imaginative beds and borders contrasted with other plants - let your imagination run riot!	40/60CM P 5 LITRE		14.99	11.99
Euonymus alatus <i>Fire bush</i>	One of the best for autumn colour. A bushy and dense growing deciduous shrub with narrow pointed deep green leaves that turn to brilliantly rich hues of crimson and pink in autumn. An easily grown plant that lends itself perfectly to planting in borders, in drifts where space allows and within woodland plantings. Slowly growing to around 2 metres or more in height and width.	20/30CM P 9CM 30/40CM P 2 LITRE 60/80CM P 5 LITRE 80/100CM P 25 LITRE		5.99 9.99 19.99 39.99	4.79 7.99 15.99 31.99

Exochorda Snow White – Magnolia Grandiflora

		Size(s) Available	Per Metre	Price/plant for qty shown (All prices exclude VAT)	
				1+	3+
Exochorda Snow White Exochorda serratifolia 'Snow White'	Exochorda are grown for the beauty of their paper white flowers, borne on long arching branches during late spring. 'Snow White' is a larger flowered variety, the saucer shaped flowers emerge from pearl-like buds, each one made of 5 petals. A tough and hardy deciduous shrub that grows perfectly well in most soil types including chalk where it does much better than its more weakly constituted (and smaller flowered) cousin Exochorda 'The Bride'. Slowly growing to 4 metres.	20/30CM P 9CM 60/90CM P 5 LITRE		5.99 19.99	4.79 15.99
Fremontodendron 'California Glory' 🏆	These are eye-catching and very floriferous evergreen shrubs produce a succession of their large bright yellow flowers throughout the season from late spring until autumn. The lobed leaves have a soft leathery feel to the touch hence the common name Flannel bush. As the name suggests these plants are native to California and so require a warm and sheltered south facing border – even better a warm and sheltered south facing wall where they can grow to 6 metres. Moist but well drained soil, may be cut back by frost in very cold spells but established plants will readily recover the following spring.	60/80cm P3litre		16.99	13.59
Hazel, Ornamental Corylus	These Hazels are easily grown and make great specimen plants, all have the characteristic catkins that appear on the bare branches during late winter. Any reasonable soil in sun or shade.				
Corkscrew Hazel Corylus avellana 'Contorta'	A well-known deciduous shrub with distinctive curiously twisted shoots that are most conspicuous in winter when adorned with the attractive long golden yellow catkins. A distinctive and valuable architectural shrub growing slowly to 3 metres.	60/80CM P 4 LITRE		15.99	12.79
Purple Hazel 🏆 Corylus maxima 'Purpurea'	This beautiful variety is valued for its exceptionally rich purple foliage, the catkins are reddish purple in colour and are followed by a crop of purple nuts in late summer. A great specimen shrub that also makes a very eye-catching hedge	60/100CM BR		8.99	7.19
Red Majestic Corylus avellana 'Red Majestic'	This is the red leaved form of the 'Corkscrew Hazel' having the same curiously twisted habit of growth but with rich wine-red foliage and purple-red catkins that emerge on the bare branches in late winter.	60/80CM P 4 LITRE		17.99	14.39
Honeysuckle, Winter Lonicera fragrantissima	A delightful semi evergreen shrub grown for its sweetly scented creamy white flowers that emerge in succession from the bare branches throughout the winter months. Best planted next to a path or near the house (or even trained on a wall) so the scent may be appreciated during the short winter days. Easy to grow in sun or partial shade. 2 metres.	40/60CM P 3 LITRE		9.99	7.99
Hornbeam 'Rockhampton Red' Carpinus Betulus 'Rockhampton Red'	An exciting new variety of Hornbeam discovered by chance on a UK tree nursery, 'Rockhampton Red' has the same growth characteristics as the widely grown common Hornbeam being a hardy native plant particularly tolerant of poorly drained soil. The leaves of Hornbeam 'Rockhampton Red' turn from green to bright red and orange from late September, the colours persisting until November when the leaves turn to nut brown with many of them being retained in the same manner as its parent. A super new plant with great potential for all the same purposes as the usual native Hornbeam – as a specimen tree, for pleaching, topiary or even as a very special hedge!	60/80CM P 1 LITRE		14.99	11.99
Indian Bean Tree Catalpa	These graceful deciduous trees have exceptionally large heart shaped leaves and distinctive panicles of white flowers that stand proudly above the foliage in late summer, often followed by the clusters of long slender seed pods from which the tree gets its name. For specimen planting (in a lawn for example) few trees are more deserving. Any reasonable soil as long as not waterlogged, not suitable for exposed sites as the large leaves tend to get damaged by wind.				
Golden Indian Bean Tree 🏆 Catalpa bignonioides aurea	An outstanding tree of spreading habit with huge buttery yellow leaves that are bronze when young. While the Golden Bean Tree will ultimately grow to 10 metres or more it is sometimes grown as a large shrub (hard pruned in spring) which increases the leaf size even further, quite something with a bold drift of blue Agapanthus in front (or anything else for that matter!)	50/70CM P 5 LITRE		16.99	13.59
Purple Indian Bean Tree 🏆 Catalpa x erubescens 'Purpurea'	Another exceptionally beautiful tree, the oversized leaves open deepest velvety purple and change through various shades of smoky purple and dark green as summer progresses. The white foxglove like flowers contrast perfectly in July and August.	50/70CM P 5 LITRE		16.99	13.59
Laburnum Vossii 🏆 Laburnum x watereri 'Vossii'	One of the most popular spring flowering trees. Laburnum Vossii is a particularly free flowering Laburnum with exceptionally long fragrant racemes of bright yellow flowers that trail down up to 50cm. A small vase shaped tree that rarely grows taller than 5 metres, it can also be trained onto arches and other shapes. A very tolerant and easy to grow tree needing little more than reasonable drainage. All parts of Laburnum are poisonous to humans.	120/150CM BR MDN		16.99	13.59
Lilac Syringa vulgaris	Needing little introduction these popular deciduous shrubs are grown for their deliciously fragrant flower clusters that appear in late spring above lustrous heart shaped foliage. Lilacs are great shrubs for mixed borders and are easy to grow. Most varieties will grow to 3 or 4 metres in any reasonable soil.				
Beauty of Moscow Syringa vulgaris 'Beauty of Moscow'	Blush pink buds open to flowers of pure white	40/60CM P 3 LITRE		11.99	9.59
Carpe Diem Syringa vulgaris 'Carpe Diem'	Bushy growing variety with handsome flower spikes of light blue-mauve	40/60CM P 3 LITRE		11.99	9.59
Lebioduszk Syringa vulgaris 'Lebioduszk'	Shell pink buds open to pure white above bright green heart shaped foliage.	40/60CM P 3 LITRE		11.99	9.59
Lila Wonder Syringa vulgaris 'Lila Wonder'	An upright variety with dense spikes of single lilac flowers with an attractive white margin.	40/60CM P 3 LITRE		11.99	9.59
Miss Ellen Willmott Syringa vulgaris 'Miss Ellen Willmott'	Creamy green buds open to pure white double flowers	40/60CM P 3 LITRE		11.99	9.59
Primrose Syringa vulgaris 'Primrose'	Beautiful pale primrose yellow flowers in dense panicles	40/60CM P 3 LITRE		11.99	9.59
Znamya Lenina Syringa vulgaris 'Znamya Lenina'	A beautiful cultivar with large fragrant flower panicles of rich reddish purple	40/60CM P 3 LITRE		11.99	9.59
Liquidambar Liquidambar styraciflua	The Liquidambar or Sweet Gum is a large beautiful deciduous tree that catches the eye in all seasons, the shiny green star shaped leaves turn to rich colours of yellow, orange and crimson in Autumn revealing the unusual corky bark of older trees after they fall. Suitable for all reasonable soils except chalk, the Liquidambar needs space as it will ultimately grow to 25 metres.	40/60CM P 9 CM 100/150CM P 5 LITRE 📦		5.99 19.99	4.79 15.99
Magnolia Grandiflora 'Ferruginea' Evergreen Magnolia	This is a bushy upright form of the evergreen 'Bull Bay' Magnolia, one of the best evergreen trees. The deep green leathery leaves are very large and rounded with a coating of rusty red hairs on the underside, especially on younger leaves. The very large goblet shaped flowers emerge on the ends of the branches during August and September, a great shrub for a sunny sheltered spot especially against a wall if space allows. 10 metres.	60/80CM P 5 LITRE		24.99	19.99

				1+ 3+
Mahonia Charity 	A stately evergreen shrub with very large glossy architectural leaves that grow to 50cm or more. The fragrant yellow flower spikes are borne proudly above the leaves throughout the winter months from November until March followed by showy bunches of deep purple berries that will attract birds. Mahonias make excellent back of border plants and thrive in shady areas turning them into focal points with their long lasting show of flowers.	30/50CM P 3 LITRE		11.99 9.59
Maple, Japanese Acer palmatum	These are smaller growing deciduous shrubs grown for the outstanding beauty of their leaves and architectural form, they are perfect as focal points in gardens of all sizes, especially next to ponds or in containers. Japanese maples need a sheltered spot in good soil away from strong winds and scorching early morning sun for best results.			
Maple, Bloodgood  Acer palmatum 'Bloodgood'	An upright growing variety with leaves of deepest purple-red that hold their colour all summer before turning to fiery bright red in autumn. Makes a great focal point growing slowly to 4 metres.	50/60CM P 2 LITRE		14.99 11.99
Maple, Dissectum  Acer palmatum 'Dissectum'	The lovely rounded, mushroom shaped dwarf Maple with light green filigree leaves that turn to golden and orange hues in autumn. A perfect focal point, especially for smaller gardens as it grows very slowly to just 2 metres.	30/50CM P 2 LITRE		14.99 11.99
Maple, Dissectum Garnet  Acer palmatum dissectum 'Garnet'	A colourful purple form of the dissectum maple growing very slowly into a rounded mushroom shape, perhaps growing to 2 metres eventually. The deeply divided filigree foliage is rich purple during to summer months changing to autumn hues of fiery red before falling.	30/50CM P 2 LITRE		14.99 11.99
Maple, Orange Dream  Acer palmatum 'Orange Dream'	A bushy spreading shrub with colourful foliage that changes throughout the season, in spring the new foliage is coral red and orange, especially at the edges contrasting perfectly with the lime green colouring of the older leaves turning to a more golden colour later in the season, especially in the autumn. Masses of tiny red flowers in spring provide further contrast, grows to 3 metres.	50/60CM P 2 LITRE		14.99 11.99
Maple, Sango Kaku  Acer palmatum 'Sango Kaku'	This is the coral bark Japanese maple, a plant for all seasons. The characteristic deeply-cut maple like leaves are pale green during summer before turning to soft canary yellow in the autumn contrasting beautifully with the coral-red bark of the branches, these become more conspicuous in winter making the coral bark maple a great focal point. Grows slowly to 5 metres.	50/60CM P 2 LITRE		14.99 11.99
Maple, Crimson King  Acer platanoides 'Crimson King'	A large striking ornamental variety of Norway maple, the leaves of this handsome deciduous tree unfurl bright purple red deepening to rich purple during the summer months turning to hues of orange and brown in autumn. The small clusters of yellow flowers appear with the leaves in spring and are red tinged. A robust tree tolerant of pollution and indifferent soil, a good colour screening tree growing up to 25 metres.	100/150CM BR MDN 150/200CM P 10 LITRE 		16.99 13.59 28.99 23.49
Mountain Ash Sorbus	Sorbus are small and neat little deciduous trees best known for the beauty of their colourful berries and foliage in autumn. They are popular with wildlife, especially birds and are easy to grow being tolerant of most soils and situations.			
Mountain Ash Embley  Sorbus 'Embley'	An exceptional small tree with long pinnate glossy green leaves producing attractive clusters of white flowers in late spring. Over the summer months these develop into large glistening bunches of showy orange-red fruits that contrast with the glowing red autumn foliage. A great tree for restricted spaces and a good choice for woodland gardens.	100/150CM BR MDN 150/200CM P 10 LITRE 		15.49 12.39 24.99 19.99
Mountain Ash Joseph Rock Sorbus 'Joseph Rock'	The feathery green leaves are composed of many small leaflets making an attractive backdrop to the white flower clusters that appear in late spring. Over the summer months these develop into creamy white clusters of berries at first before turning to deep amber yellow in the autumn contrasting well with the red, orange, copper and purple colours of the foliage. The berries persist on the tree long after the leaves have fallen making this tree a popular stopping point for birds. 10 metres.	100/150CM BR MDN 150/200CM P 10 LITRE 		15.49 12.39 24.99 19.99
Mountain Ash Pink Pagoda  Sorbus pseudohupehensis 'Pink Pagoda'	A small yet vigorous variety with unusual blue-green pinnate leaves and large clusters of attractive pink tinged flowers appearing in spring, these are followed by large bunches of persistent and very colourful pink berries. The foliage turns to attractive hues of orange and red, an easy tree tolerant of most soils and exposed sites. 8 metres.	100/150CM BR MDN 150/200CM P 10 LITRE 		15.49 12.39 24.99 19.99
Parrotia Persica  Persian Ironwood	A delightful small tree, the wavy edged deep green leaves have an attractive red margin to them when young. In autumn the foliage turns to breath-taking colours of rich crimson, orange and yellow. During late winter and early spring clusters of small crimson flowers appear. Older trees develop attractive peeling bark similar to a London Plane tree. An easy to grow tree that usually develops naturally into a multi-stemmed specimen up to 8 metres.	30/40CM P 9CM 60/90CM P 5 LITRE		7.99 6.39 19.99 15.99
Quickthorn, Flowering Crataegus laevigata	These compact shrubby little trees are closely related to the Hawthorn commonly used for hedging, grown for their profusion of highly ornamental double flowers in spring they are tolerant of most soils, exposed and coastal sites making them a reliable addition especially suited to smaller spaces. The flowers contrast nicely against the mid green foliage, they develop into a neat round headed tree.			
Quickthorn, Double Pink  Crataegus l. 'Rosea Flore Pleno'	A profusion of rich pink double flowers clothe the branches in mid to late spring	100/150CM BR MDN 150/200CM P 10 LITRE 		15.49 12.39 24.99 19.99
Quickthorn, Double Red Crataegus l. 'Pauls Scarlet'	Masses of double scarlet flowers in mid to late spring.	100/150CM BR MDN 150/200CM P 10 LITRE 		15.49 12.39 24.99 19.99
Strawberry Tree  Arbutus unedo	A charming small evergreen tree with long pointed glossy dark green foliage that sets off the pendent white flowers that appear in autumn on older plants. The flowers open at the same time as the strawberry like fruits from the previous year's flowers mature. Mature specimens have attractive 'shaggy' peeling brown bark on the stems. An excellent garden worthy plant that also does very well near the coast. 6 metres eventually although its size is often smaller and can be restricted.	15/25CM P 9CM 60/90CM P 5 LITRE		5.99 4.79 19.99 15.99
Viburnum 'Kilimanjaro' Viburnum plicatum f. tomentosum 'Kilimanjaro'	An exciting new Viburnum producing pretty white lacecap flowers that sit on the tiered branches of this upright, conical deciduous shrub during late spring and early summer. The mid green leaves assume fiery autumn tints before falling. A great new plant for the shrub border named Chelsea Flower Show plant of the year in 2015. Much more upright in growth than other Viburnums so a great plant for confined spaces.	40/60CM P 3 LITRE 90/120CM P 7 LITRE 		14.99 11.99 29.99 23.99
Wisteria	Successfully cultivating these beautiful climbers to produce their spectacular flowers (and the difficulty of it) is a regular topic of discussion with gardeners, there are just a few golden rules. Always plant them somewhere sunny in well prepared soil and prune them a couple of months after flowering back to five or six leaves of new growth to encourage flowerbud while also restricting their size. Finally, always buy a grafted plant as they will flower from a much younger age and don't feed it too much. Then you can enjoy their extravagant sweetly scented racemes of flowers every May and June for very many years to come. These are fantastic climbers for a sunny spot, or they can be trained up a stout post and pruned as a beautiful standard or 'lollipop'. We have the following varieties, all as young grafted plants. Wisteria floribunda is the Japanese Wisteria, always twining clockwise with beautiful, exceptionally long flower racemes, the flowers opening in succession at the same time as the leaves unfurl. Wisteria sinensis is the Chinese Wisteria, always twining anticlockwise with the long flower racemes opening before the leaves, all of the flowers opening simultaneously.			
Wisteria floribunda 'Alba'	Fragrant Lilac tinted white flowers in long 40-60cm racemes.	20/40CM P 9CM		10.99 8.99
Wisteria floribunda 'Macrobotrys'	Fragrant lilac flowers tinged blue-purple in exceptionally long racemes up to 100cm.	20/40CM P 9CM		10.99 8.99
Wisteria floribunda 'Rosea'	Delicately scented pale rose pink flowers in long racemes.	20/40CM P 9CM		10.99 8.99
Wisteria Floribunda 'Violacea Plena' (W.f. Black Dragon)	A delicately scented double flowered Japanese Wisteria, the flowers are violet-purple. A real show stopper when in full flower.	20/40CM P 9CM		10.99 8.99
Wisteria sinensis 'Prolific' (W.s. Blue sapphire)	Well scented soft blue-violet flowers in long racemes.	20/40CM P 9CM		10.99 8.99
Wisteria venusta (W. brachybotrys 'Shiro-kapitan')	A beautiful variety often called the 'Silk Wisteria' producing large racemes of very fragrant white flowers.	20/40CM P 9CM		10.99 8.99
